MORE TALK ABOUT WATER

Meeting of Ratepayers Held Yesterday to Discuss Proposed By-Laws.

IMPORTANT FACTS STATED

Foreman Preece Is in Favor of Pumps for a Temporary Supply.

At a meeting of ratepayers in the city hall yesterday afternoon which had been arranged for to consider the water question, Thos. Preece, foreman of the construction department of the water works system, stated that he was in favor of installing a pump at Elk lake, if it was only to be a temporary arrangement but if it was to be permanent a 30-inch main would be the best, and when he favored the recommendations it was on the understanding that it was to be a permanent system.

It was also stated that Engineer Topp was also of the same opinion, and had signed the report on that understanding.

The meeting was called by a number of representative business men and among those present were C. F. Todd, Fred Norris, John Hepburn, D. R. Ker, Hon. Mr. Justice Martin, C. A. Holland, J. H. Lawson, Sr., G. E. Wilkerson, Geo. Powell, H. E. Levy, C. E. Reulfer, R. E. Gosnell, John Nelson, Mayor Morley, Alds. Stewart and Hall, along with Water Commissioner Raymur and Thos. Preece, foreman of the water works department.

Object of Meeting

In opening the meeting, Mr. Ker took the responsibility of calling the meeting and said that he did so with the intention of obtaining as much information as possible on the two schemes that are now being advocated. He was of the opinion that it was time that something should be done to get a better supply of water.

He produced a number of questions that had been asked by Mr. Powell with the request that the water commissioner be requested to answer them, for by so doing, much information could be obtained.

Mayor Morley was then voted to the chair and the questions with their answers were:

Some Questions Asked

No. 1. An expression of opinion from the water commissioner as to the relative value of the two systems proposed.

Mr. Preece—If it is intended to remain at Elk Lake permanently, the 30-inch main will be the best. If it is intended only as a temporary arrangement I will favor the pumping system.

No. 2. Give the annual estimate of maintenance including cost of the pumping system as proposed at the lake, compared with enlarged pipe?

Mr. Raymur—The cost will figure out about the same for as long as the pump is in operation; but interest and sinking fund will have to be provided for 50 years whereas the pump is only intended to be used for two or three years.

No. 3. What length of 30-inch main is proposed?

Mr. Raymur—About five miles of wood pipe.

No. 4. What will be the extra storage capacity in the entire system?

Mr. Raymur—The 30-inch main will hold about six times as much.

No. 5. Can the grade be improved in relaying a new main?

Mr. Raymur—Yes; in several places.

No. 6. Will the old cast iron main removed be of use in a new distributing system?

Mr. Raymur—If the main system is adopted it will be taken up and used, but if the pump system is decided on, it will be used in its present position.

No. 7. Will the high level tank proposed do away with the present pumping station?

Mr. Raymur—No; it will be necessary.

system of purification, securing absolute immunity from Impurities

A GREAT EARTHQUAKE OCCURS AT VALPARAISO

Chilian City Badly Shaken and Feared That the Loss in Life and Property Will Be Very Large.

ONLY MEAGRE REPORTS AS YET OBTAINABLE

Shock Was Terrible one However as it Was Recorded By Seismographs all Over The World.

ALARMING REPORTS ARE RECEIVED IN EUROPE

LONDON, Aug. 17.—Some London firms trading with Valparaiso, Chile, is reported badly damaged by earthquake. One report received here is that the situation in Valparaiso may prove to be as serious as the San Francisco disaster.

Practically every building in the city is damaged, and there are fires in different parts of the city. Many persons are reported killed and injured.

The earthquake has interrupted cable facilities to lower South American points, and communication is reserved to the route via Lisbon.

The report from Valparaiso as to the loss of life has not been confirmed. Fires are burning in various parts of the city.

Valparaiso is a fortified seaport of Chile and the most important commercial city of the western coast of South America. It has a population of about 150,000. It is the capital of a province of the same name, and is situated on a large bay of the Pacific Ocean, 75 miles west of Santiago, with which it is connected by rail.

Business Totally Suspended

New York, Aug. 17.—A private cable despatch to W. R. Grace & Co. from Valparaiso, received by way of Lima, Peru, says that the earthquake in Valparaiso is severe and that business in the city has been totally suspended. The despatch further stated that Grace & Co.'s buildings in Valparaiso were badly damaged, but that none of the occupants were injured.

The Insurance Loss

Liverpool, Aug. 17.—Most of the British fire insurance companies have interests in Valparaiso, Chile, but the amount involved was not nearly so great as was the case with San Francisco.

Recorded at Honolulu

Honolulu, Aug. 17.—The tide gauges here show a disturbance apparently of distant origin. Beginning at 5:23 o'clock this morning three waves an hour, having been indicated showing an oscillation from the normal tides of between three and four inches.

Alarming Reports at Buenos Ayres

Buenos Ayres, Aug. 17.—The newspapers tonight publish telegrams from Mendoza, Buenos Ayres and Chile in the mountain passes of Uspalata and Portillo, to the effect that many houses in Los Andes district were destroyed by the earthquake, and that there have been a large number of casualties. The interruption of all means of communications with Chile causes much anxiety. Many rumors of disaster are afloat.

Disturbance Lasted Five Hours

London, Aug. 17.—Prof. John Milne, the seismologist, reports from the Isle of Wight that his records indicate an earthquake as great as that of San Francisco lasting for five hours, apparently located along the coast somewhere north of Valparaiso.

Communication Interrupted

London, Aug. 17.—A despatch to the Reuter Telegraph company from Buenos Ayres tonight says: "Telegraphic communication with Chile is still interrupted. Santiago and Valparaiso are completely cut off. The Pacific cables are only working from Iquique northwards. It is certain that a number of houses have been wrecked at Los Andes, Los Andes, also known as Andes and Santa Rosa de Los Andes, is a town in the province of Aconcagua, Chile."

Eagerly Seeking News

Buenos Ayres, Aug. 17. (6 p. m.)—In the absence of telegraphic communication beyond Punta Del Inca, it has been impossible up to this hour to obtain accurate details of the destruction of the earthquake in Chile. The managers of the telegraph companies here state that nothing is coming through. Press reports purporting to come from Chile are purely imaginative. London and New York are eagerly seeking news from the district. Officials of the Pacific railway say it is the belief that damage at Valparaiso is not so serious as has been stated.

Valparaiso Office Closed

New York, Aug. 17.—At 11:30 o'clock tonight the central cable office of the Western Union Telegraph Co. received a service message stating that the Val-

paraiso office is closed until 7 o'clock tomorrow.

Could Not Get News

Buenos Ayres, Aug. 17.—All the attempts made here to obtain telegraphic communication from Chile regarding the reported earthquake were fruitless up to a late hour this afternoon on account of the interruption to wire communication.

Latest Information

New York, Aug. 17.—Except for a private message received early today reporting an earthquake in Chile and damage to buildings in Valparaiso. No direct news from Chile has as yet been received.

The early reports coming from different points stated that the earthquake had resulted in great loss of life and wide damage to property. Up to 11 o'clock tonight, there had been nothing to confirm these reports.

The Associated Press correspondent at Buenos Ayres cables that it is feared that the town of Los Andes, in Aconcagua province, had been destroyed. He points out that Buenos Ayres has no direct communication with the disturbed district.

No official information has reached Washington from Chile and while positive information is lacking, New York officials of the cable companies having connections in South America, tonight express the opinion that the first reports of the earthquake were exaggerated.

All cables reaching New York from Chile and Valparaiso were evidently much delayed according to the statement of those officials who were unable to get any information bearing on the subject other than the fact that an earthquake had occurred, that the disturbance had interrupted telegraphic apparatus and interfered with communication.

There is much anxiety tonight among those who have friends and relatives in Chile. The cable companies and newspapers are making every effort to secure definite information.

It is pointed out that the entire absence of any word from official sources in Valparaiso and other points in Chile may be taken as indicating considerable exaggeration in the reports of loss of life and extent of damage.

The Stricken City

Valparaiso, chief of the cities and principal port of Chile, with 150,000 people, one-tenth of them foreigners, mostly British and Americans, is one of the most historic cities of South America. It was founded in 1536 by the Spanish officer, Juan de Saavedra, who named it after his birthplace near Cuenca in Spain. Sir Francis Drake, who rounded the Horn in 1577 in his fighting galleon, laden with the British adventurers who went to despoil the Spanish commerce of South America, captured the city in 1578, appearing before the city on December 5th. Again in 1596 the

city was taken and sacked again by Hawkins and his adventurers. The Dutch corsair, Van Noort, sacked the place in 1622. Then when the looters no longer fought with the rich South American port, the earthquakes caused much loss, the present shock being by no means the first.

Valparaiso was visited by severe shocks of earthquakes in 1730 and 1822 when great damage and loss of life resulted, and by earthquake shocks in 1839 and 1873, and a short time prior to the San Francisco, a severe shock was felt at Valparaiso. The city suffered by fire in November, 1858; and on March 31, 1866, it was bombarded by the Spanish fleet under Admiral Nanez, when a large part of the port was laid in ruins.

Valparaiso, the chief port of Chile, and one of the largest of South America, situated on a fine bay, is a proud city. The land, or waterfront is mostly made of land, and the residential section is on hills rising from the waterfront and commercial streets, with their imposing three and four story offices adjacent thereto. Some of the finest residences are on English hill and an incline railway is built on this rise. The city lies at the south of the bay, which is 2 1/2 miles wide, semicircular in form and well sheltered, except toward the north. The shipping of the port is extensive and many British firms, including W. R. Grace & Co., Shoup and others are largely interested there. There are two floating docks capable of accommodating vessels of from 1,400 to 3,000 tons.

Situated at the base of a range of barren hills, varying from 1,000 to 1,400 feet in height the city's busiest section, to which would be that most seriously affected in an earthquake, lies in a narrow strip of land between the hills, upon whose rise are many fine residences, and the sea. Sites have been formed for many places, also by cutting away the cliffs. Further space for residential purposes is afforded by the deep dells or water courses between the hills, which open toward the sea, in picturesque waterways, either side of which are covered with houses.

Much of the foreshore has been raised by such occurrences as that now reported—earthquakes.

It was in 1885 that the erection of an extensive embankment was begun. This is all made land and consequently considered more liable to earthquake tremors. The older portion of the city, (Puerto), in which are the principal public and commercial buildings, is separated from the newer portion, called the Almendral, by a projecting point. The city is defended by a chain of forts, begun in 1866.

The principal public buildings are the government palace, the customs house, the large bonded government warehouses, hospital, city hall, and two institutions include a theological seminary, a naval academy and a lyceum; the last named had about 600 students.

The commercial enterprises of Valparaiso are largely dependent on the foreign merchants, especially British, American and Germans, of whom there are large numbers. The city is not only the commercial capital of Chile, but also the place of residence of the foreign consuls. The principal industrial establishments are the government railway marine shops, a large foundry and machine shops, coach building and wheelwright works, and a very large sugar refinery, the raw material for which is obtained from Peru.

The population is over 150,000, and of these about one-tenth are foreigners. The shipping trade is very extensive. The greater part of the tonnage being British, with Chilean close behind. The foreign trade is chiefly with Great Britain, United States, France and Germany. The principal exports are metals, (nitrate, bar copper, silver produce, copper and silver regulus and gold and silver specie), wheat, barley, flour, wool, nuts, hay, beans, honey, codine, coal, hides and guano; and the imports include iron, steel, wine, nails, machines and tools, sugar, rice, cashmeres, prints, shawls, wines and beer.

E. Baynes Reed, the officer in charge of the Victoria meteorological station, obtained the record of the shock, which, while it does not appear as bad as that which devastated San Francisco was quite prolonged, and from this fact would be regarded as very serious. But there is the question of distance to be

(Continued on Page Two.)

FREIGHT RATES ARE ADJUSTED

Railway Commission Meets Views of Coast Boards of Trade.

NEW CLASSIFICATION MADE

Farmer Killed by a Vicious Bull ---Arranging for Dominion Rifle Meet.

OTTAWA, Aug. 17.—(Special.)—The railway commission has issued an order under which the board of trade of Victoria, Vancouver and New Westminster, with whom is associated the Canadian Manufacturers' association have won a substantial success. They claimed that the C. P. R. discriminated against coast points in competition for the trade with inland centres. The board orders that the additional toll of five cents a hundred weight on all traffic which originates in the eastern states of the American union, and which is now added and charged on freight originating in Eastern Canada and destined to the same British Columbia points, shall cease. It also orders that a carload weight shall be the minimum one prescribed in Canada in freight classification; also that the same allowance shall be made for lumber, etc., used in safeguarding freight as in other parts of Canada.

Killed by Vicious Bull

Jas. Busbie, a bachelor farmer, of Beckett's creek, near Cumberland, was found in a field this morning, dead, by a vicious bull. Because of its ferocity the animal had been dehorned a short time ago. Busbie leaves two brothers, one in Alpega, Mich., and the other near Regina.

Dominion Rifle Meeting

A large attendance of marksmen is expected at the annual meeting of the Dominion Rifle association which opens at Brockville, Aug. 27th. Entries are being filed rapidly with Secretary Major Wiler. Almost the first entry received was that of a team from the new province of Alberta.

Manitoba Jockey Club

Letters patent of incorporation have been granted to the Manitoba Jockey club with a capital of \$200,000. The incorporators are Wm. McKenzie, president of the Canadian Northern, Hon. Robt. Rogers, Mr. Wm. Whyte, of the C. P. R., Geo. F. Galt, G. L. Drewry, F. W. Morse and Fred Hubach.

Voice From the East

Amherst, N. S., Aug. 17.—The Maritime board of trade in session here yesterday adopted a resolution urging the Dominion government to encourage emigration to Maritime provinces. It was claimed that the up-building of Western Canada had entailed a tremendous drain on the population and the resources of Maritime Canada, and it was time there was some recompense.

Drowning Accident

Chatham, Ont., Aug. 17.—While out bathing yesterday afternoon, Chatham's summer resort, Margaret Lapp, 22 years of age, a school teacher of this city, and Duncan Ferguson, eighteen years of age, son of a prominent farmer of Chatham township, were drowned.

Bakers Elect Officers

London, Ont., Aug. 17.—Master bakers yesterday elected officers for the new term. Mark Breden, Toronto, is president. In an address the new president said he hoped to see the day when bakers could raise the price of a loaf without a howl from the public. The day of the small shop, he said, was passed.

Strike at an End

Toronto, Ont., Aug. 17.—Shortly before one o'clock this morning an agreement was reached between fifty independent employing contractors and striking carpenters which practically ends the strike inaugurated a week ago. The terms of agreement are: eight hours a day, thirty-three cents an hour; agreement to expire May 1, 1908.

Ore in Alberta

Edmonton, Aug. 17.—T. C. Dennis, who is attached to the mines section of the geological survey, has just returned from a short trip to Pelican Portage on the Athabasca river, some 120 miles below Athabasca landing. He has been investigating some of the mineral resources of Alberta on behalf of the department and the object of his visit to Pelican Rapids was to report on the present state of the hole sunk at that place some eight years ago, from which there has been a tremendous rush of natural gas.

Further north in the vicinity of Fort McMurray boring operations for oil are being actively proceeded with. Two drill rigs equipped to reach a depth of 3,000 feet are now in this part, and results will be watched with great interest by everyone. Geologists think there is no doubt that large quantities of oil exist in formations underlying that part of Alberta.

A Terrible Tragedy

Regina, Sask., Aug. 17.—A terrible tragedy, whether accident or intentional, the taking of evidence alone will have, occurred about 9 o'clock yesterday morning on the farm of Josiah Gilbert, twelve miles south of this city. The one fact which is not denied is that Gilbert, who is over 70 years of age, shot Barrett Henderson, who came here this spring from Prince Edward Island and purchased Gilbert's farm. Henderson was hurriedly brought to the Re-

HAPPENINGS ON THE PACIFIC COAST

Big Water Power Scheme in Washington--Manoeuvres at Tacoma.

SPOKANE, Aug. 17.—Water rights on the Simlahekan river extending seven miles about Concochely, Wn., have been appropriated by A. M. Dewey and M. D. Winder, of Spokane. Mr. Dewey states he and associates propose to build seven dams in the river, develop 35,000 horsepower, establish a system of electric lines to towns in Okanagon county and finally build a smelter at some central point, probably near Concochely.

Stackpole Murder Trial
Los Angeles, Aug. 17.—The expected sensation in the Stackpole murder trial failed to materialize today when the defendant took the witness stand in her own behalf and after twenty minutes of questioning, in which she simply denied his guilt of murder, retired without adding anything of interest in the way of evidence.

Army Manoeuvres
Camp Tacoma, Aug. 17.—At 4:30 this morning soldiers in the Brown brigade were awakened quietly by messengers sent from tent to tent, and by 5 o'clock the army was up and ready to move. Thus the defending army started out in search of invading blues with a desire to gain a point where a stand could be made to advantage. The day was fine for manoeuvres.

Guilty of Perjury
Portland, Aug. 17.—The jury in the case of Clarence E. Zachary, manager of the Butte Creek Land, Livestock & Lumber company, found defendant guilty of perjury in connection with proof of the Charles A. Watson homestead. The jury deliberated in less than 15 minutes.

Held Up the Circus
Tacoma, Aug. 17.—When Forepaugh's circus started to parade in the city today from grounds just outside the city limits, Chief of Police Maloney threw a

squad of policemen across the street and notified the showmen that it was violation of the ordinance to parade without a license. The showmen paid \$250 and the parade moved shortly after midday.

Good Cargo of Codfish
Anacortes, Aug. 17.—The schooner Alice, first of the codfish vessels of the Robinson Fisheries company arrived at 2 p. m. All are well. Vessel in charge of Captain Mathewson, brings good cargo.

FRENCH GOVERNMENT FIRM.

Paris, Aug. 17.—The cabinet council's discussion of the church and state separation question today resulted in the government's firm resolve to maintain the law.

A TIP TO RUSSIA.

London, Aug. 17.—A despatch from Tokyo to the Daily Telegraph states that Great Britain, the United States and Japan have intimated to China the necessity of insisting that Russia establish customs stations in northern Manchuria.

CHARGED WITH GRAND LARCENY

Pittsfield, Mass., Aug. 17.—Dr. Whitman V. White, a consulting physician and a member of the board of managers of the Manhattan State hospital of New York, was arrested here today on a charge of grand larceny. He was taken to New York this afternoon. It is charged that Dr. White took \$129,200 belonging to the James O. Sullivan estate in New York.

NELSON CRICKET TEAM COMING

To Take Part in Tournament Here on Monday Next.

Nelson, B. C., Aug. 17.—The Nelson cricket team, fourteen strong, left this evening to take part in the tournament which commences at Victoria on Monday next. A strong effort was made to induce players from other points to join in the trip so that a representative Kootenay team might visit the coast, but the plan failed and men who left tonight are all Nelson cricketers. They are a strong combination and will give good account of themselves at Victoria.

A serious forest fire is raging near Ymir and this afternoon it had destroyed the Hunter V. tramway and was sweeping on to the mine buildings. Western Union wires were down, owing to the fire since early in the afternoon.

FISHING OUTLOOK ON THE FRASER

Reports From Hatcheries Say Few Salmon Have Reached the Hatcheries.

VANCOUVER, Aug. 17.—(Special)—Reports from the Fraser River hatcheries indicate that very few salmon have yet reached the spawning grounds. Hatchery officials are quoted as expressing the opinion that the extension of gill net fishing until September 15 will prove very deleterious to the hatcheries. Japanese are still fishing on the river, but few fish are being caught.

Cariboo Pioneer Dead
John Quinn, a Cariboo pioneer, died in St. Paul's Hospital today at the age of 100 years. For the past 11 years Quinn has been an inmate of the hospital, but most of the time has been very active. He was merely taken in on account of his extreme age.

Start Canadian Club
A movement is on foot to start a Canadian Club in this city, and a meeting for this purpose will be held in the board of trade rooms next Wednesday afternoon.

"Made in Vancouver" Show
The Hundred Thousand Club has decided to hold a "Made in Vancouver" day on September 1, when goods made in the city will be exhibited in all store windows and heavier materials in vacant lots on business streets.

The Tennis Tourney
There were some interesting events at the tennis tourney this morning, but no close contests. The results were:

Ladies' singles, handicap—Miss Fordham beat Miss Jukes, 6-1.
Mixed doubles, handicap—F. G. Crickmay and Miss King beat M. Griffin and Miss Garland, 6-1, 6-2; F. G. Crickmay and Miss King beat W. E. Burns and Miss Macpherson, 7-5, 7-5.
Mixed doubles—J. D. Hunter and Miss M. Pitts beat F. L. Beech and Miss V. Pooley, 6-4, 6-4.
Ladies' singles, handicap—Miss Hobson beat Miss Bunting, 6-2, 6-3; Miss Jay beat Miss Schofield, 6-2, 6-3.
Men's doubles, handicap—Major Williams and W. B. Ferrie beat Dr. Ross and J. A. Meldrum, 6-4, 6-3.
Ladies' singles, open—Miss Ryan beat Miss V. Pooley, 6-0, 6-0.
Mixed doubles, handicap—B. A. Rhodes and Miss Hobson beat Rev. S. Ryall and Miss J. G. Fordham, 2-6, 6-2, 6-0.
Men's singles, open—Major Williams beat H. B. Farquhar, 6-1, 6-1.

FISHERIES COMMISSION IN EXECUTIVE SESSION

Joint Meeting of Local and Washington Commissioners Arranged.

The fisheries commission held another executive session yesterday at the board of trade rooms, lasting for five or six hours, at which all matters of immediate importance which were before the commissioners were considered, but the result of their deliberations the commissioners declined to make public, nor would they state what suggestions or recommendations they may make in the premises. The work of preparing for the report of digesting information gathered, and getting ready for the international conference to be held at Vancouver on September 19, when the commissioners from Washington state will be present, will now be carried on.

The proposed extension of the open season from August 25 to September 15 was considered, but no announcement in that connection was made.

The commissioners left for Vancouver last night by the steamer Princess Beatrice. No further sittings will be held until September 15 at Vancouver, when the commissioners will make preparations for the international conference. Prof. Prince will probably return east to sit at meetings of the Ontario commission, of which he is also chairman, until needed again in this province, about a month hence.

At the meeting to be held with the Washington commissioners at Vancouver on September 19, legislation calculated to work to the preservation of the sockeye and other matters relating to the fisheries interests of Puget Sound and British Columbia, including the workings of the hatcheries and the need for their extension, will be taken up.

Following is the make-up of the joint commission: British Columbia—Prof. E. E. Prince, commissioner of fish and game; Dominion of Canada—Prof. Babcock, commissioner of fisheries for British Columbia; Manager Sweeney of the Bank of Montreal, Vancouver; R. Hall, M. P. P., Victoria; Rev. Mr. Taylor of Nanaimo, and Mr. Brown of New Westminster, Washington—State Fish Commissioner J. L. Riseland; J. A. Kerr, E. E. Alnsworth and T. J. Gorman, of Seattle; E. B. Denning and Frank Wright, of Bellingham; and A. E. Woolard, of Anacortes.

The Vancouver Province says: The announcement that the season for gill netting and trap fishing for salmon would be extended from August 25 to September 15 was apparently news to a great many canners in Vancouver. It would appear from the statements of a number of canners interviewed today that they had no idea that any request had been made to have the fishing season extended, and many of them express the opinion that any extension which would allow the continuation of gill netting for sockeyes after August 25 would be detrimental to the preservation of this species of fish.

The Vancouver paper says also: Mr. J. C. Brown of New Westminster, a member of the commission, expressed the opinion that from his observations the earnings of the traps on Vancouver Island had been greater than represented. His idea is that many of the reports given out as to large losses at the traps are exaggerated,

and he believes that these tactics have been pursued for business reasons.

The run of sockeyes on the Fraser River is not yet all over. This is evidenced by the fact that of all the boats out fishing very few of them returned without fish, and the average on the whole river was from 15 to 20 fish per boat. At the prevailing high prices fishermen are able to make good wages on small catches.

Most of the white fishermen and some of the Indians are reported to have quit fishing, but the Japanese are still working and it is likely they will continue till the end.

A recent arrival from Rivers Inlet reports the catch there as follows:

Thames	17,000
Beaver	17,000
Good Hope	15,000
Bain	15,000
Bruswick	18,000
Kidalla	16,000
R. L. C.	20,000

The Seattle Post-Intelligencer says of conditions on Puget Sound: Among cannerymen it is the practically universal opinion that the run of sockeyes for this season is over. The total of Puget Sound has not reached the lowest estimate of 150,000 cases.

Prices for the season's pack have not yet been announced, although cannerymen expect an advance of about 15 cents per dozen over last year's figures. Following are the prices which, approximately, are expected to prevail: Tails, per dozen, \$1.50; flats, \$1.65; halves, \$1.05. The figure last year was \$1.35 for the tails, \$1.50 for the flats and \$1 for the halves.

TENNIS IN THE EAST.

Southampton, L. I., Aug. 17.—W. A. Larned, former national champion, won the final of the singles of the Meadow Club lawn tennis tournament today after five sets, defeating Karl H. Behr, Jr.

HON. MR. TEMPLEMAN COMING.

Ottawa, Aug. 17.—Hon. Mr. Templeman left tonight for Toronto. He will remain there until Tuesday and then proceed to Victoria. He expects to reach home in about ten days.

A SPLENDID CROP.

Grain Dealers Association Issues an Estimate of the Situation.

Winnipeg, Man., Aug. 17.—The Northwest Grain Dealers' association issued the following estimate of the crop of 1906 under date of August 15: Wheat, 4,435,000 acres at 13.4 bushels per acre, 59,630,000 bushels. Oats, 1,838,000 acres at 11.2 bushels per acre, 20,585,600 bushels. Barley, 540,000 acres at 21.1 bushels per acre, 11,394,000 bushels. Flax, 55,000 acres at 12.4 bushels per acre, 682,000 bushels. Wheat of old crop in farmers' hands to market, 510,000 bushels. Weather conditions for harvesting have been perfect with the exception that perhaps it has been too hot. Fifty per cent of the wheat is cut and will practically be completed by the end of next week if the weather continues. There has been considerable shrinkage in the average yield of wheat, through the hot winds and extreme hot weather during the last two weeks, but there is still a splendid crop in all provinces.

Killed by Lightning
Carberry, Aug. 17.—William Densitt, a young farmer, while feeding his horse was instantly killed by lightning today.

Shooting at Brandon
Brandon, Man., Aug. 17.—One arrest was made last night in connection with the shooting of a Galician in the boarding car at Kenmore.

Suicide at Winnipeg
Winnipeg, Man., Aug. 17.—Clifford Campbell, C. N. R. baggage agent, suicided by drinking carbolic acid on Main street.

ROOSEVELT AGAIN.

Western Politicians Strongly in Favor of Teddy for Another Term.

Washington, Aug. 17.—There are indications that President Roosevelt will be practically forced by the Republican party to accept nomination for office again.

Republicans of the West are quietly resolved to renominate President Roosevelt, according to Representative Campbell of Kansas, who has been speaking in various western states, including Illinois, Iowa, Minnesota and Nebraska. Mr. Campbell is the author of the Standard Oil investigation resolution and is a senatorial candidate.

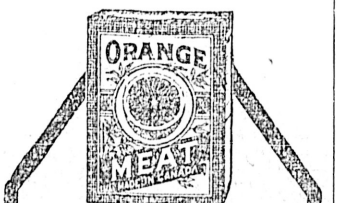

"I talked with hundreds of people, business men, farmers, preachers, politicians and men in other walks of life," he said. "I find republicans are not greatly concerned over the 1908 nomination. They are saying President Roosevelt will be renominated and will be forced to accept; that he is sincere in his desire not to run again, but that his work is not yet done and he ought to be kept four years more in the White House."

"The feeling is that if the nomination is tendered him unopposedly he can not refuse it. Of course, politicians of the machine type are holding back, but I believe the great mass of Republicans want Mr. Roosevelt again, and will have him."

Mr. Campbell declares the Democratic disorganization is such that there is no hope of Democratic control of the house, and that Mr. Bryan, while popular, cannot compete with Mr. Roosevelt for president.

KIDNEY DISEASE—GRAVEL.

"I was afflicted with kidney disease and gravel in its most severe form having often a stopped water accompanied by the most dreadful agony. By using Dr. Chase's Kidney-Liver Pills the disease was eradicated from my system in less than six months. I have gained in weight, sleep well and feel better than I have for twenty years."—Mr. W. Smith port Dalhousie, Ont.

A GREAT EARTHQUAKE OCCURS AT VALPARAISO

(Continued from Page One.)

taken into account in making comparisons which in part would indicate the difference in the severity of the shock felt. Valparaiso is many hundred miles south of San Francisco, and, therefore, any disturbance of the earth there would not be felt to the same extent as a shock at San Francisco. From the local record the most recent earthquake occurred at about 4:10 yesterday afternoon, and it lasted from that time until 8 o'clock. The heaviest shock was felt at 4:45, when the swing of the boom of the seismograph was about ten millimeters. The next bad shock was at 5:45, and this like its predecessor was very prolonged.

CAMBRA—Specially suited to four-in-hand or bow. Most such shapes ruin head and patience to get tie right—with this one tie slips easily into place.

200 each, 3 for 50c

Comes in three heights—11 1/2, 13 1/2, and 15 inches at back. Made of BEST linen—can you think of a fabric you'd rather have your collars made of? Doubly sewn to make it fray-proof.

MORE TALK ABOUT WATER

(Continued from Page One.)

sary to pump to the tank, no matter what system is adopted.

8. If sufficient water is found in Highland district, what is the estimated cost of storing same and connecting with the city system?

Mr. Raymur—About \$400,000, including redistribution.

Mr. Raymur—The first to Mr. Raymur referred to the question of Mr. Raymur, he being in a better position to answer it. Explaining, he said that 25,000 feet of 30-inch pipe would be of wood.

The 30-inch Main would be laid as far as Dumbarton's, and from there to Market street a 24-inch main would be laid; from there two 12-inch pipes would be used, and it would replace the 12-inch cast iron pipe.

Mr. Todd wished to know how the water was brought in at present, and Mr. Raymur explained that there was a mile of 24-inch pipe on Douglas street; beyond Swan Lake a 12-inch main is used, while a 16-inch main runs to North Dairy Farm.

In reply to Mr. Holland, Mr. Raymur stated that the difference between the two mains was considerable.

Mr. Redfern—If the 30-inch main is put in, will the 12-inch pipe be taken up?

Mr. Raymur—Yes; the estimates are based on that, and it will make the distribution considerably less than it would otherwise be.

Mr. Ker—Does the estimate for a reservoir include a site?

Mr. Raymur—Yes; we have already had an offer.

In reply to Mr. Levy, the water commissioner said it was mainly the distribution system that made the water so bad.

Mr. Levy—Will the lake supply the quantity that the new main will carry?

Mr. Raymur—For a time it will.

Mr. Gossnell—What is the capacity of a 30-inch main?

Mr. Raymur—Six million gallons.

Mr. Gossnell—What is the capacity of the lake?

Mr. Raymur—Two and a half million gallons.

Mr. Gossnell—What is the idea of having a main that will take more than the supply?

Mr. Raymur—To be used in case of fire. He pointed out that the maximum consumption was 6,000,000 gallons, which the 20-inch main could carry if required to; but it was only at certain times that this amount would be taken. He also stated that at present the water is lower than it has been for some years.

Mr. Holland wished to know how the supply was to be obtained if the level of the lake was lower.

Mr. Raymur explained that 6,000,000 gallons would not be drawn off regularly, but only at intervals.

Mr. Raymur—Six million gallons.

Mr. Raymur—Two and a half million gallons.

Mr. Raymur—To be used in case of fire. He pointed out that the maximum consumption was 6,000,000 gallons, which the 20-inch main could carry if required to; but it was only at certain times that this amount would be taken. Mr. Raymur—Six million gallons.

Mr. Raymur—Two and a half million gallons.

the revenue to be derived from Goldstream, and Mr. Raymur said that the estimate was \$21,000 from the trust company and \$10,000 from the water company. With the prospect of having the electric company increase their demands; but owing to an agreement with the water company, it would be impossible to figure on more than \$8,000 from the electric company. He pointed out that the company could have Goldstream at any time by paying \$8,000 for the remainder of 30 years. Referring to the proposition to purchase water by the gallon, Mr. Ker said it was useless to consider the proposal.

It was also pointed out that the water company offered to sell the water to the city for \$800,000, which led Mr. Redfern to remark, "We must buy all or none."

The question of what the mains would be made of was then taken up, and in reply to Mr. Redfern, the water commissioner said that the 30-inch main was all wood.

Mr. Ker—Do I understand that the entire five miles of 30-inch main is wood?

Mr. Raymur—Yes.

Mr. Ker—Are you satisfied that it is all right?

Mr. Raymur—I am.

Mr. Ker—What is Seattle doing? Have you investigated their system?

Mr. Raymur—They are in favor of wood. Mr. Stewart—Have you the reports of this year? His Worship stated that the life of wooden pipe was 40 years, and that of steel 20.

Mr. Gossnell—The life of wood pipe is the life of the wire that binds it.

Mr. Raymur explained that it was originally intended to have iron pipes for the distribution, but it was changed to wood. And it was his opinion that wood pipes would make the water cleaner.

His Worship said there was one thing about Elk lake that the other sources did not have, which was the gravel beaches, through which all the water passes to the lake.

Regarding the Supply at the Lake—Mr. Raymur said that it did not fill this season by 20 inches, while last year it no more than filled, and the present level of the lake is seven feet higher than it was when the supply was first taken from that place.

In answer to a question, Mr. Preece said that if another rainfall was had like that of 1894, it was very likely that the lake would overflow.

Mr. Harris—If the lake was raised, could it hold the water for the following year?

Mr. Preece—Yes; but we would have to wait for a heavy fall to fill it.

Mr. Adams' report, the total supply at Elk lake was 2,400,000 gallons, with a 60-gallon per capita, and at present there is being used 100 gallons per capita; and the lake could be secured by raising the lake would be 400,000 gallons.

Ald. Stewart said we know that the capacity of the lake is 4,000,000 gallons more than at present, and when it is advisable to spend a large sum of money on the system, or save it to spend on a system where 5,000,000 or 6,000,000 Can Be Secured?

Mr. Ker was of the opinion that the distribution should be placed in a separate by-law.

This was pointed out to be impossible, for without a supply a distribution would be useless.

Mr. Todd called attention to the fact that the 30-inch main was supported by the officials, while the 20-inch main was only recommended by the committee.

His Worship—That is right.

Mr. Todd—How is Mr. Topp?

His Worship—Mr. Topp is in favor of the 30-inch main.

Ald. Hall—Mr. Topp is only in favor of it on the understanding that it is a permanent system; but if it is a temporary arrangement, he is in favor of the pump.

Mr. Stewart said that Ald. Stewart mentioned in his remarks that Elk lake was going to cost \$500,000, which was not right, and he did not think those present should be made to take that impression.

Ald. Stewart—Am only taking it from Mr. Adams' report.

Mr. Preece was then asked his opinion regarding the two proposed systems, and said: "If it is intended to remain at Elk lake, the 30-inch main is the best, but if it is only temporary, so that further time may be had to inquire into Goldstream and Highland district, I am in favor of the pump, the new pump at the lake and the North Dairy pump giving a sufficient supply."

In answer to Mr. Gossnell, he said the pump would practically double the supply, giving 9,000,000 gallons per day more.

His Worship—Is the present main laid the wrong way on?

Mr. Preece—No; it is laid the right way. It does not make any difference, anyhow.

Mr. Redfern—If a fire occurred, which would be the best?

Mr. Preece—The 30-inch main; but if they had the pump, they could secure all the water that was required.

In reply to Mr. Gossnell as to how long it would take to lay the 30-inch main, Mr. Preece said it was hard to say, but Mr. Raymur said five weeks after the trench is dug.

Mr. Wilkerson wished to know if the present main would stand an extra pressure. Mr. Preece said it would.

Ald. Stewart—Does all the water pass through the filter beds at present?

Mr. Preece—Yes.

Ald. Stewart—A 30-inch main is laid, will it filter all the water?

Mr. Preece—No; it will require more beds.

Continuing, Mr. Preece said: "I was of the opinion that the system was only a temporary one, and I am not supporting that Elk lake is to be abandoned, for 2,500,000 gallons could be secured from that source by gravitation."

Ald. Hall—If a 30-inch main was laid, would it assist in case of a fire on the high levels?

Mr. Preece—Not without a pump.

Mr. Todd wished to know why the committee did not recommend the tank on the high levels.

Ald. Stewart—The reason is because the majority of the ratepayers appeared to favor the idea of spending as little money as possible on a temporary arrangement.

Ald. Stewart also said that the report of the committee was recommended by three engineers, and the city officials were also in favor of it. He was of the opinion that by securing 9,000,000 gallons for \$8,000 was a good bargain, and was the best that could be done till a decision was reached as to the permanent supply.

Ald. Hall said the committee were providing for the higher levels by withdrawing some of the services from the 16-inch main, and transferring them to the 12-inch, thus giving the 16-inch a better force. He pointed out that the redistribution was from the report of Mr. Adams, and according to the report, if a 30-inch main is laid, the supply will be good for five years. Ald. Hall stated that if it was ever decided to go to Goldstream or Highland district, it would not

be good business to lay a 30-inch main to Elk lake at the present time, and called attention to the fact that Mr. Preece was in favor of installing a pump. He also said that if a 30-inch main was laid to Elk lake and a fire like that at West Westminster occurred, with the present fire apparatus, it would be impossible to save the city; and with a pump on the 12-inch main they were as safe from fire as they would be with the 30-inch main.

Mr. Preece was asked if the city could secure 6,000,000 gallons from Highland district, why it was necessary to maintain the pipes to Elk lake, and replied that the city might grow beyond the supply from Highland district, and it would then be possible to get in an extra supply from Elk lake.

After a short informal discussion the meeting adjourned.

GOVERNMENT STREET PROPERTY IS SOLD

Lots on Corner of Government and Humboldt Street Change Hands.

A real estate deal of considerable magnitude was consummated yesterday when the property belonging to the Loewen & Erb estate, situate on the northeast corner of Government and Humboldt streets, changed hands. It is understood that the sum involved in the transaction is in the neighborhood of \$60,000.

The property in question, which is considered one of the choicest bits of realty in the city, owing to its proximity to the new C. P. R. hotel and the waterfront, has a frontage of 86 feet 6 inches on Government street and a depth of 132 feet, running back to Gordon street. The deal was negotiated by A. W. Jones & Co., Ltd., and A. J. W. Bridgman, the financial and real estate agent of Government street, acting for the two parties respectively. For the present the name of the purchaser is withheld.

The property in question is from all standpoints splendidly situated—being high in elevation and commanding a magnificent view of the harbor, parliament buildings and Olympian mountains. It has long been looked upon with envious eyes by shrewd investors and the prediction is made that with the growth of the city it will shortly be of very great value.

COLD KILLS THE GERM.

Lieut. Perry Says There Are No Bald Heads in the Arctic Region.

The people come back from Klondike testify to the fact that no native bald heads are there. The evidence is that the cold climate kills the germs that eat the hair off at the root. Lieut. Perry, who went to the Arctic regions, gives the same evidence. Newb's hair has been kept from falling out by the cold climate. It kills the germ that eats the hair off at the roots, and the hair grows again. Herpicide is the first hair remedy built upon the principle of destroying the germ that eats the hair off. Its phenomenal sale demonstrates the correctness of the scalp theory. Sold by leading druggists. Send 10c in stamps for sample to The Herpicide Co., Detroit, Mich.

HOW "TINSHOP GEORGE" BECAME A CHIEF

Recent Arrival From River's Inlet Tells of Potlatch at Awekayno Village.

Samuel Smith, a recent arrival from River's Inlet, yesterday told of a recent swash potlatch at the Awekayno village, at the head of River's Inlet, at which "Tinshop George" of the Owekaynos, showed his "klosh tumtum" and became "Captain George" and a chief. He said:

"When the fishing season was over and the Indians had finished fishing, 'Tinshop George,' an Indian who had been saving his money and blankets for the past four years, sent his big canoe to all the different canneries loaded with happy Indians, and with flags flying, to invite all the different tribes to his potlatch. Next day the Indians started to arrive at the Owekayno village, and there was great rejoicing. Every tribe had its skin-drum band, and every chief had to make a welcome speech and tell how big a tree he was."

"Then there was the feast," which "Tinshop George" had got ready for the Indians who came from Storm Islands, from Blonfin Harbor, from Fort Rupert, from Alert Bay, from Knights Inlet and from Kingcombe. Fifty boxes of apples, barrels of soaplike berries (worked up till they looked like a lather), big tubs of oolichan grease and lots of dried fish and piles of blankets were ready, and then the potlatch started.

"Tinshop George's men started by distributing a pile of 2000 blankets. Calling the names of the different Indians who were to receive the presents, he gave to each one his share of blankets, according to his standing in the tribe, the chiefs of course getting more than the common Indian. But everyone got a share, and all were happy."

"Then they gave away about \$2000 in money and loads of pots and pans. A big dance then started, which lasted all night, and this finished the potlatch and made 'Tinshop George' of the Owekayno tribe no longer plain 'Tinshop George,' but Captain George, a proud Indian chief."

Goes to Telegraph Creek.—R. H. McInnes, who for some time past has been on the teaching staff of the Victoria College, received word yesterday of his appointment as teacher at the school at Telegraph Creek, in the Cassiar district. Being an ardent admirer of all athletic games and an enthusiastic member of the Y. M. C. A., Mr. McInnes will be missed by his numerous friends in this city. He left for his new home last evening.

Canadian Trust Co.—The Canadian Trust Company, Ltd., has been incorporated with a capital of \$50,000. It proposes to act and conduct business as financial, insurance, collection, real estate, house, special and general agents and brokers, and generally to exercise the functions of its name indicates. Other companies of which it is a member are in the Gazette are the B. C. Information Agency, Limited, capital \$10,000; Bedwell Bay & Belcarra Co., Ltd., capital \$20,000; Reebond Mining Co., Ltd., non-personal liability, capital \$10,000.

Some Appointments.—Only a few minor appointments are recorded in this week's issue of the British Columbia Gazette: Bert Blyth, of Arrowhead; James D. Taylor, of New Westminster, and William G. Robb, of Whitewater, have been appointed justices of the peace for the province. Edward Edwards, of Revelstoke, becomes registrar of votes for that constituency vice Wm. E. McLaughlin, resigned. T. H. Devereux and S. F. St. J. Steadman, two solicitors of London, England, have received commissions for taking affidavits for use in the supreme court of this province.

Horsemen's Grievance.—Victoria horsemen protest against the lack of interest taken in the chances of their success in the forthcoming exhibition races by those having control of the track. The latter, they contend, is in a deplorable condition, and has been so for many weeks. As a result it has been impossible to give locally owned horses the thorough course of training which is so necessary to put them in shape to participate in the first competitions which are expected to be run in connection with the annual show under the auspices of the B. C. Agricultural association.

A Montreal Visitor.—J. Simpson, a member of one of the oldest Canadian families, and the foremost authority on real estate in Montreal, is in Victoria on a pleasure trip. Although 68 years of age he is as active as much younger men and will spend a few days taking in various points of interest in the vicinity. Mr. Simpson has always enjoyed wide popularity among others in the same business as himself as evidenced by the many positions of trust to which he has been elected. He has been president of the Montreal Real Estate Exchange and vice-president of the National Real Estate Association of America. In 1891-2 he was a member of council of the Montreal board of trade and of the Montreal Sanitary association in 1892-3.

Pulp Company Incorporates.—The current issue of the British Columbia Gazette contains notices of incorporation of several important companies. Probably the most important is the Pacific Pulp & Paper Company, Limited, with a capital of \$250,000. Its powers are most extensive and include everything that may arise in regard to the exploitation of the company on a large scale. Notice is also given on behalf of the same company, that compliance has been made with the provisions of the "Power Companies Relief Act, 1902" which places it in the same position as a company incorporated under part iv of the "Water Clauses Consolidation Act." Another power company has also been incorporated, the Northwest Power Co., Ltd., with a capital of \$10,000.

Hon. T. C. Casgrain Here.—Hon. Thomas Chase Casgrain and wife, of Montreal, are staying at the Oak Bay hotel. Hon. Mr. Casgrain was very prominent in public life some years ago. He has practised law in Quebec and is now the senior partner in the firm of Casgrain, Angers & Laverie. He was appointed a Q. C. by the Marquis of Lansdowne in 1887. He became a crown prosecutor for the district of Quebec in 1882, and at the time of the famous Louis Riel trial for high treason, in 1885 he was retained by the crown as a junior counsel. He was appointed professor of criminal law in Laval University in 1888, and received the degree of LL.D. in the institution. After sitting for Quebec county in the Quebec assembly from 1886 to 1890 and for Montmorency from 1892 to 1896, he became attorney-general in the De Boncheville government, and afterwards the Taillon administration, and in 1894 was appointed a member of a committee to revise and amend the code of civil procedure. In 1896 he was appointed vice-president of the Canadian Bar association.

No Wasters.—We do not sell waster (crochery that is not perfect) but sell the first grade crochery only: 6-inch plates, \$1. doz.; 7-inch plates, \$1.25 doz.; dinner plates, \$1.50 doz. See our window, H. A. Brown & Co., 80 Douglas street.

It is the savings of the world that have made the civilization of the world. Savings are the result of labor, and it is only when laborers begin to save that the results of civilization accumulate. Thrift began with civilization; we may almost say that thrift produced civilization. Thrift produces capital, and capital is the conserved result of labor. The best savings system is that of The B. C. Permanent Loan and Savings Company, branch office, 39 Government St., Victoria, B. C.

MR. CUTHBERT BACK FROM THE NORTHWEST

Everywhere a Great Amount of Interest Being Taken in Victoria.

Herbert Cuthbert, secretary of the Victoria Tourist and Development Association, returned a few days ago from a most successful trip to the cities in the wheat centre and the Northwest. Although he has been in the city several days since his return, Mr. Cuthbert's health broke down slightly and he has been confined to his room. The indisposition, however, only lasted about five days, and yesterday Mr. Cuthbert made a visit to the Tourist rooms.

While in the East Mr. Cuthbert represented the city at the large exhibitions at Winnipeg and Brandon, and he also conducted an extensive advertising campaign at Regina, Moose Jaw and Calgary, and incidentally he stayed over at the well known resorts of Banff and Field, in the Rockies. The number of tourists visiting the two mountain resorts is ever increasing in number, and Mr. Cuthbert foresees the benefit which this city would derive by extending an invitation to the guests and leaving sufficient advertisement matter, made a very good work.

A large number of wealthy Eastern citizens visiting these resorts would willingly extend their tour to the terminus and Victoria if only they knew of the scenic beauty and attractiveness which the Pacific Coast can offer. While in Winnipeg Mr. Cuthbert arranged both full and quarter page advertisements in the Manitoba Free Press, and both were noted for their pointed facts in regard to Victoria. Mr. Cuthbert was also good enough to devote time to the reporters of various newspapers who were anxious for interviews, and in one of the interviews he treated the promising bulb-growing industry at some length. He distributed an enormous amount of literature while on tour, having circulated 10,000 "Impressions," the latest creation in advertising designed and printed in Victoria. 5000 leaflets calling attention to the vicinity of Victoria as a perfect district for fruit growing, dairy farming and poultry raising; and he also distributed 5000 of the leaflets descriptive of the various attractions for tourists in the city. All fruits at the various exhibitions which were from farms near Victoria were labeled very pointedly, "Grown in Victoria," and the method had a marked effect on visitors.

When questioned as to the advertising done by R. M. Palmer, the provincial horticulturist, Mr. Cuthbert said: "The opportunities for Mr. Palmer's work in connection with horticulture and fruit growing are so vast that it seems to me that the government would be doing a very wise thing if they allowed him to devote his sole energies to that department of provincial work. The market opening up in the Northwest for all fruits is so vast that greater efforts should be made to select suitable lands in British Columbia and have them brought into

readiness for fruit culture immediately. The people in Winnipeg and adjacent towns are simply ravenous for fruit, and right now. The fruit industry is as important to this province, as it is to California. Mr. Palmer is capable of doing the government the biggest service by turning his attention to the possibilities of the fruit outlook.

"It is acknowledged throughout Manitoba and the Northwest, so the Free Press stated, that Victoria is a long way the best advertised and best known city in that section of Canada, due to the previous work conducted by the old Tourist Association."

At every point he visited Mr. Cuthbert found scores of visitors talking of Victoria and of the boom that is going to take place in Victoria and vicinity. While in Winnipeg Mr. Cuthbert was informed of a big excursion which had been arranged by the C. P. R. from all points west of Regina to Vancouver and Victoria. The tickets, which are being sold for three days of the present month—the 15th, 16th and 17th—are good for 60 days, and are selling in large numbers at the cheap rate of a single fare plus \$2.

In addition to the literature Mr. Cuthbert had about circulated very cheaply, with excursion tickets for sale was sent a special supply immediately on Mr. Cuthbert's arrival home.

HAD AN AWFUL TIME

But Chamberlain's Colic, Cholera and Diarrhoea Remedy Cured Him.

It is with pleasure that I give you this unsolicited testimonial. About a year ago when I had a very severe case of measles I got caught out in a hard rain and the measles settled in my stomach and bowels. I had an awful time and had it not been for the use of Chamberlain's Colic, Cholera and Diarrhoea Remedy I could not have possibly lived but a few hours longer, but thanks to this remedy I am strong and well, and I have never since had any trouble. I shall always speak a good word for this remedy.—Sam H. Gwin, Concord, Ga. For sale by all druggists.

TWO MEN POISONED.

Fredericton Men Drink Cyanide of Potassium Through Fatal Error.

Fredericton, N. B., Aug. 16.—Albert W. Edgecombe and Lemuel A. W. Tibbitts, two leading Fredericton citizens, are dead as the result of drinking cyanide of potassium in mistake for water, last night. Both men were sitting in the rear of Shute & Co.'s jewelry store, with D. E. Crowe, of the jewelry firm, when the latter was called to the front of the shop. The two men secured a drink of water, took a jar on a sink and drank of its contents. It contained the deadly poison. The usual treatment was given, but without avail. Tibbitts died half an hour later and Edgecombe lingered two and a half hours.

DEAFNESS CANNOT BE CURED

by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous surfaces. We will give One Hundred Dollars for any case of Deafness caused by Catarrh that cannot be cured by Hall's Catarrh Cure. Send for circulars, Free. F. J. CHENEY & CO., Toledo, O. Sold by Druggists, 75c. Take Hall's Family Pills for constipation.

OUTRAGE IN TURKEY.

Salonica (European Turkey, Aug. 16.—At Yovitsa, near Florina, on August 14, a band killed three Bulgarians, clubbing a girl and kidnapping and murdering five others.

CHARGED WITH MANSLAUGHTER

Buffalo, N. Y., Aug. 16.—Michael C. Laporte, a saloonkeeper, John Leibinger, an ice peddler, and John Fink, a barber, all of Buffalo, have been arrested and charged with manslaughter. They are charged with having caused the death of George S. Desmond of Summerville, Mass. Desmond was assaulted in a street in front of Laporte's saloon a few days ago. Desmond and his wife, the police say, were robbed. A bracelet belonging to Mrs. Desmond was found in Fink's possession.

A Great Automobile Story

Possibly the best short story of the month—certainly the greatest automobile fiction-story we have ever read—is "Three Speeds Forward" by Lloyd Osbourne—author of the "Motor-maniacs" you know.

A fascinating tale of boldness and love—interesting to all lovers; doubly so to lovers of motoring.

Everybody's Magazine

The Great Fiction Number

OCCURRENCES AT COMMERCIAL HOTEL

License Commissioners Warn Licensee Regarding Happenings on Sunday.

The conduct of the Commercial hotel, almost opposite the city police station, occupied the attention of the license commissioners yesterday. The Mayor and Ald. Dwyer and Mr. Phillips, commissioners, heard a report from the police and evidence was taken regarding the presence of some drunken women at the hotel, who were noisy, on Saturday night and Sunday morning. A woman came to the lock-up on Sunday morning at 12:45 a. m. and reported that another married woman whose husband was in the hospital, and who lived with her was intoxicated and she was unable to get her to leave the Commercial hotel, as a man was there buying intoxicants for her and urging her to remain. While the officer, Constable Claydars, was investigating, a young man came to him and said: "Officer, look what they're doing with my wife." He pointed to a woman, lying intoxicated on a bed. The officer asked the proprietress of the place who was responsible for these women getting in such condition, and she replied that she was not responsible for people who came to her house. She said she only paid her license "to sell booze." The officer advised her to get the woman out of the house, but she declined. The officer then secured a back and carried one of the women to it at the request of her husband. There was loud singing and piano playing heard plainly at police barracks both before and after midnight.

Mr. Lawson, appeared for the proprietress of the Commercial hotel. The Mayor read the police reports, giving a lengthy report of the occurrences by Constable Claydars, and the license was called. He said he didn't see that he could make the women go home. They wanted to stay until after supper, and he didn't want to send anyone out of the house. The proprietress was called and she declared her responsibility for the women. She couldn't see what kind of liquor they were taking. She admitted the constable's report to be substantially correct.

Mr. Lawson then asked that evidence be called to support it. The woman who sought to get her companion to leave the Commercial hotel and went to the police station for Constable Claydars, gave evidence. In her report she said that she and her companion couldn't get the woman home. She wanted to remain for supper. The woman was quite drunk. She was accompanied by another woman, whom the constable carried out later. The proprietress was quite angry with her for trying to have the woman released. She finally left the woman with her husband. The woman did not come home until later in the morning.

A workman, whose wife had been carried out by the constable, said that when retiring home just before midnight he found his wife away. He heard loud singing at the Commercial and recognized her lying intoxicated on a bed. She had four glasses of champagne, as well as other drinks.

The proprietress of the Commercial hotel said the women came at 10 p. m. asked if they might go upstairs and play the piano. They were sober then, and they were intoxicated when they left. Drunks were sent up to them, and after a while they asked to have the bottle sent up. This was done. There was a man there, whom she knew, and he paid for the bottle sent up. When the woman came with the police officer and one of the women's husbands came in, she got excited. Thought there was going to be trouble.

Ald. Davey.—This man you speak of, was he a resident of the hotel?

Witness.—Oh no. He didn't know the ladies. I told him, being a married man, he had better go home. He said he wouldn't go until after supper, which he had ordered.

To Mr. Lawson, witness said she had kept the Commercial hotel for a year and there had been no complaints. She had kept licensed houses at Mount Sicker and Nanaimo and had no complaints registered. The bar was closed at 11 p. m.; it always was.

Ald. Davey.—Is it unusual for ladies to come there to have liquor served?

Witness.—No, sir. They come. They're in the habit of coming, and I guess they'll still come.

Chief Langley.—Isn't it your duty to see that women don't get drunk on the premises?

Witness.—Yes, sir.

Ald. Davey.—Do you know it's against the law to sell liquor to a drunken person?

Witness.—Yes, sir.

Ald. Davey.—You didn't do it fully?

Witness.—No, sir.

Constable Claydars gave evidence of the occurrences as detailed in his report, and the Mayor asked the chief of police if there had been many complaints against this house.

Chief Langley.—Lots before; not in this license.

Mayor Morley said in consideration of this being the first offence it was decided to let the matter rest with a severe warning. The commissioners would insist against business being carried on in the manner disclosed, and if any similar occurrence is reported the license will be cancelled.

NEWSPAPER MAN'S DEATH.

Binghamton, N. Y., Aug. 16.—C. F. McCormick, the well known newspaper man and writer, died here today. For more than a score of years Mr. McCormick was editorial writer of the Leader.

SUMMER RESORT BURNED.

Charlottetown, P. E. I., Aug. 16.—The Acadia Hotel, one of the most popular summer resorts on the island, containing sixty guests, mostly Americans, was destroyed by fire early this morning. The occupants escaped.

SUBDUED THE OUTBREAK.

Moscow, Aug. 16.—An outbreak occurred today in the central prison among the political offenders confined there, owing to the insubordination of the wardens. The wardens of the prison being unable to cope with the disturbance, were forced to call in half a company of the Petrova regiment, who subdued the outbreak by a volley which killed two men and wounded ten prisoners.

FREIGHT RATES QUESTION.

Residents at Island Points Send Petitions to the C. P. R.

Letters are being forwarded by the secretary of the board of trade today to officials of the C. P. R., asking that something be done towards improving the existing freight rates to Ladysmith, says the Ledger. Evidently Ladysmith is not the only city that has a kink coming, however. The merchants of the city are not satisfied with the treatment by the C. P. R., and some of them seem to think matters are not improving in the way of cheaper freight rates, although a cheaper schedule has been issued by the C. P. R. Under the old management of the E. & N., the merchants had a rate ranging from \$5 to \$6 per ton and sometimes as high as \$7 and \$7.50 per ton. Small parcels that used to cost 50 cents for delivery at the wharf are now 75 cents, and in some cases where the rates are doubled.

"These high rates do not in any way conduce to the prosperity of the district, and ultimately the people have to pay the piper. So long as there is only one way of delivering goods at the Bay there can hardly be any prospect of a reduction of rates. It would seem that a way out of the dilemma would be for the Dominion government to build a public wharf on Lady's beach, where it is said that goods could be delivered at the small rate of \$1.50 per ton, and double that amount would have the goods delivered in Cumberland. This is a matter that the city council and the merchants could probably have a nice quiet talk over together with mutual profit to the merchants and citizens.

FINE AS SILK.

That Is What a Little Girl Says of Chamberlain's Colic, Cholera and Diarrhoea Remedy.

I am a little girl eight years of age, do not know much, but one thing I do know, and that is that Chamberlain's Colic, Cholera and Diarrhoea Remedy is fine as silk for one with a stomach ache. I had a very severe pain last night, took a dose of it and was relieved at once. My mother told me to take it, and I did. This remedy is for sale by all druggists.

AUTO PARTY FINED.

White Plains, N. Y., Aug. 16.—Deputy Sheriff Townsend in the town of Scarsdale today held up a touring car for speeding at the rate of 35 miles an hour, in which were Senator and Mrs. Chauncey M. Depew and a woman said to be a relative of the senator. The chauffeur denied any excess of the limit. He gave \$25 cash bond for the chauffeur to appear Friday.

MILITARY MANOEUVRES.

Tacoma, Aug. 16.—After a cold night in camp last night, the mercury dropping within three degrees of the freezing point, the troops in manoeuvre camp were early astir today. The march to-morrow morning will be taken up at 8 o'clock, and rival forces will probably meet at what is known as "Spray Ranch."

DISTURBANCES IN POLAND.

St. Petersburg, Aug. 16.—Today's despatches from Poland are hardly less grave than those of last night. At Lodz, after the police station had been blown up and burned, Cossacks and other troops fired into the crowds and more or less street fighting followed. The casualties are not given. The revolutionists used bombs against the police at Warsaw today.

MacKinnon Bldg., Vancouver, B.C.

MINING ON QUEEN CHARLOTTE ISLAND

Representative of Japanese Firm Down With Rich Ore Samples.

Mr. K. Aldano, a representative of the Japanese firm of Amaya, Ikeda & Co., Vancouver, is in the city today in charge of a shipment of ore from their property situated on Queen Charlotte Island, says the Ladysmith Ledger. In conversation with a Ledger representative this morning, Mr. Aldano stated that there are many prospectors at present on Queen Charlotte Island, there being in the neighborhood of fifty claims staked within a short time in the vicinity of Mr. Aldano's property, situated about 100 miles south of Skidegate.

"One of the causes of the rush," said Mr. Aldano, "is the fact that Messrs. Watson and Thompson have recently sold a valuable claim in this vicinity to a Seattle corporation for the sum of \$90,000, receiving \$30,000 down and the rest in divided payments. Mr. Watson Knapp, a mining engineer of Seattle, has charge of the work at present. Regarding our claim, we do not yet know what it will amount to. So far, it promises well, and if further development work bears out the present indications, we will own a mine that will be heard from. I brought down four tons to the Tyee smelter, and if the results of the treatment are as anticipated, we will ship ore here when we get into shape for shipping. The property is a copper proposition, although the ore contains some gold and silver as well.

"Yes, we operate a fishing station on Queen Charlotte Island. At least it is called a fishing station, although in reality we are after shell fish. The kind we handle are what are commonly known as the 'sea ear,' although the proper name is abalone. We employ divers, who bring up the shell, and the meat from them is then boiled in salt water, after which it is dried.

"We ship the product to China, where it commands a very good price, abalone being considered a very nice dish amongst the Chinese. In some places, California, the treatment of the abalone shell is valuable for making fancy buttons, ornaments, etc., but the British Columbia shells are too small and thin for such work. However, the meat is just as good, and that is what we are after.

Asked if there was any truth in the report that the property owned by his company had been bonded for \$150,000, Mr. Aldano replied there was not. If the mine is paying proposition, the Japanese company will operate it themselves, and if it is not, they will be the losers.

The Amaya, Ikeda company own the fish saltery at Departure Bay, Nanaimo, and have branch offices at Seoul, Korea, and Tokio, Japan.

Struck It Rich.—Late arrivals from the Tanana bring word of the good luck that has recently come to two well-known Dawsonites, Charles Frey and Hans Stark. The latter is an old Dominion miner with 15 years of experience in the north, while Frey has been known as a musician and electrical expert in Vancouver. Last winter Stark secured an option on one above on Cleary at a price he considered very cheap, and Frey put up the money to buy it. The ground was worked during the winter for all it was worth, and their cleanup in the spring ran a little over \$150,000. Frey has gone outside on a vacation, leaving Ben Davis to carry for his business interests in Fairbanks. Stark is handling the claim and proposes to turn it upside down this winter.

In the matter of the "Companies Winding Up Act, 1905," and in the matter of M. R. Smith & Co., Limited:

NOTICE IS HEREBY GIVEN that the creditors of the above-named Company are required, on or before the 23rd of August, 1906, to send their claims duly verified to Garret Smith, of Victoria, B. C., the Liquidator of the said Company, and if so required by notice in writing from the said Liquidator to come in and prove their said claims at such time and place as shall be specified in such notice, or in default thereof they will be excluded from the benefit of any distribution made before such debts are proved.

Dated this 23rd of July, A. D. 1906. By M. R. SMITH & CO., Limited. Solicitors to the above-named Liquidator.

NOTE.—M. R. Smith & Co., Limited, were incorporated in 1900. The Company, wishing to extend its operations, and desiring to take in fresh capital, caused to be incorporated on the 13th of July, 1906, a new Company, with increased capitalization and larger powers, with exactly the same name, and all the assets of the old Company have been transferred to the new Company, and all the liabilities of the old Company are assumed by the new Company. The winding up is purely voluntary.

Have a Bottle

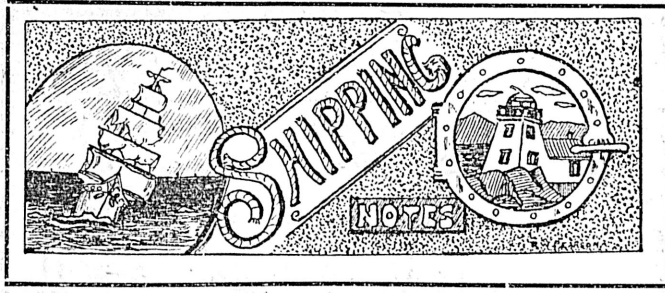

"Red Wheat" is mighty good whisky for any time—any occasion—for sickness and for health.

Have a bottle in your grip for companion sake. Have a bottle on the sideboard for good fellowship. Have a bottle at the office for a tonic when you don't feel "up to the mark."

"Red Wheat" Whisky

is bottled in bond under Government supervision. That guarantees its age and purity. "Red Wheat" is put up in 32 ounce bottles. You get a full quart of fine, old whisky when you buy "Red Wheat."

ROYAL DISTILLERY, Hamilton, Canada

The British ship Aristomene, Captain Young, which reached port yesterday morning in tow of the tug Tacoma, 42 days from Acapulco, in ballast, had considerable canvas torn to shreds during a fierce hurricane, with tremendous sea, encountered on the 13th and 14th of this month when nearing the entrance to the Straits. The storm, which blew at first from the north-west, afterward veered to the south-east and was very severe. The Aristomene was under the three lower topsails only when the first gusts of the hurricane were encountered, and all three sails were lost. The foremast was hauled up, but before it could be made fast the canvas was blown to ribbons and only a little tatter of fluttering rag was left; two lower topsails, therefore—lower and mizzen topsails—were also lost, being blown out of the bolt ropes. The ship labored heavily in a big sea, soon confused exceedingly, as the wind shifted during the blow from northwest to southeast.

The Aristomene, which took a cargo of Cardiff coal to the Mexican port, has been chartered to carry a cargo of lumber to Talat or Iquique.

The Aristomene, with Captain Young in command, was in Victoria two years ago, and Captain Young has many friends at this port.

A THRILLING TRIP.

Old Hulk Had Badly Frightened Passengers When She Sprang a Leak.

With a hole in her bow two feet long and three-fourths of an inch wide, the hulk of the old bark Enoch Talbot lay for more than two days in Safety Cove, Queen Charlotte Sound, while her crew of twenty odd Slavonian and Italian fishermen feared for their lives. The Talbot was towed to Pleasant Harbor, Alaska by the tug Sea Lion, in command of Capt. John Bollong, for years one of the best tugboat masters of the Puget Sound Tugboat company. The story of the trip of the Talbot is replete with thrills, as the old hulk labored heavily with a big weight of water inside of her and her crew of fishermen bound for a northern cannery became so excited that they tied life preservers around their bodies, lashed the preservers to their baggage and sat solidly on the deck of the hulk, waiting for the worst to come. Leaving Tacoma August 1 the tug carried her tow, laden with salt, coal and kindred supplies in safety till Johnson Strait was reached, on August 2. Here Capt. Bollong was startled to hear cries of distress from the deck of the ancient bark, where he turned to find the men gathered, waving their hands and arms in the air and shouting wildly in a jargon of tongues.

Scintillating the crowd carefully and listening now and then for a word of English, the skipper at last made out that the bark had sprung a leak, and that the men demanded that she be heaved.

"I'll be blown if I'll beach her here!" shouted Capt. Bollong, after a glance at the cliffs of Johnson Strait. Finally, discovering with the aid of a megaphone what the trouble was, he had a windmill rigged aboard the hulk and this, aided by the steam pumps, enabled Captain Hagen, commanding the Talbot, to keep the water down while a new start was made for the North.

But the troubles of the passengers and crew of the Enoch Talbot were not over by any means. As long as the wind kept up the windmill worked at the rate of ninety miles an hour, and the pumps gained on the water from the hold, flowing in at the rate almost equal to that of a two-inch fire nozzle. But in Queen Charlotte Sound the wind died away, and suddenly the ancient bark was seen to take a list to starboard.

Immediately there was a cry for help from the passengers and crew, and again Capt. Bollong screwed the megaphone to his ear to find out the trouble. Capt. Hagen shouted: "A foot more

THE MONTEAGLE'S CARGO.

Will Have Much Freight, Including Lumber for Japan.

The C. P. R. steamer Monteaule, which sails on Monday afternoon for Yokohama and Hongkong will take out about 2,000 tons of miscellaneous freight. Included in the cargo will be a shipment of 150 tons of flour, which is being shipped by one of the flour mills on Puget Sound. A good sized shipment of cotton will also be sent out on the steamer. Several small motor launches are being shipped to the Orient by a Detroit firm, while a couple of automobiles consigned to Japan are also being sent out on this steamer. Another item will be 75,000 feet of lumber, which is being shipped to Japan to the order of Mr. S. Tamura, a former resident of this city, who is now living in Osaka, Japan.

THE SEALING RAID.

Punishment Cannot Exceed \$200 Fine and Six Months' Imprisonment.

The talk of a possible prosecution of the Japanese who raided the Pribilof islands on a charge of piracy is absurd, says the Seattle Post-Intelligencer in an editorial published yesterday. Piracy is defined by international law. It is an offence against all of the nations of the world. A pirate is subject to capture by the warships of any country whose vessel captures him, without regard to the pirate's nationality or the place where his piratical offences were committed.

The United States court for the Southern District of New York, in the case of United States vs. Parker, said, 5 Bate, P. 11-13, "Piracy is defined by the laws of nations to be forcible depredation upon property on the high seas, without lawful authority, done animo furandi; that is, as defined in this connection, in a spirit and intention of universal hostility. A pirate is said to be one who roves the seas in an armed vessel, without any commission from any sovereign state, on his own authority, and for the purpose of seizing by force and appropriating to himself, without discrimination, every vessel he may meet. A piratical voyage, therefore, is a voyage for these purposes.

The attempt is made to show that these Japanese committed piracy, because of the federal statute which makes robbery on shore, committed by the crew of a piratical vessel, piracy, punishable by death. The character of the vessel establishes the nature of the offence; not the converse, as is claimed. The Japanese vessels were not on a piratical voyage under the definition of piracy, for one thing. Neither did they commit robbery on shore for another; nor was there any attempt to commit robbery. The fur seal are not the property of the United States nor of any one else. That point was conclusively settled by the Behring sea award. The

United States can forbid any one killing them, when they are on land or in water belonging to the United States, as the individual states can enforce regulations for the protection of fish or game within their jurisdiction. No prosecution for larceny could be had against any man for killing and carrying away a fur seal, any more than for killing a grouse or catching a trout.

If these Japanese were guilty of piracy, any one who lands from a vessel and shoots game out of season or catches fish out of season is a pirate. Even more closely approaching piracy, would be the offence of a small boy, out on a summer cruise in his canoe, who landed and stole apples or watermelons from some farm, for he, in fact, would be committing the offence of larceny, an offence recognized as criminal in itself as well as being in violation of the statute law.

The Japanese committed several statutory misdemeanors, for the gravest of which the punishment prescribed by law is a fine of \$200 and imprisonment not to exceed six months.

There is not the slightest possibility of any federal prosecuting officer attempting anything intrinsically so ridiculous as the prosecution of these men for piracy. To do so would certainly be to create an international complication out of what is now a very simple, although regrettable, incident.

BEST STEAM PRODUCER.

Master Mariners All Speak Highly of the Coal of the Province.

That British Columbia possesses coal superior for steaming qualities to that mined in all other countries is a fact that is being sent broadcast every time a steam vessel arrives on the shores of this province says the Nanaimo Free Press. Alfred Holt & Co., the C. P. R. the Union Steamship company, of New Zealand, who operates vessels to and from Vancouver, are undisputed authorities for the above assertion, and their desire to use the coal of this province to that of other coal regions is manifested every time one of their vessels reach British Columbia waters. The big Blue Funnel liners which operate between Vancouver and the old country are consumers of enormous quantities of fuel and when traveling en route to Vancouver from their home port are delayed several days by frequent stops to load bunker coal.

During the summer months, when weather conditions are fair, their coal stops are less frequent, but during the stormy months in which heavy work is done in encountering high seas and heavy winds, their vessels consume larger quantities of coal.

From Vancouver to Japan the passage is made much quicker than to this coast, and the difference in the time of both trips by the big liners is simply a question of the lasting qualities of the two kinds of coal used.

That the C. P. R. recognizes the commercial value of the provincial product is demonstrated by the company's large purchases. Steamers supplied with the British Columbia article can raise more steam for their passage across the Pacific than they are able to do with the fuel obtained across the seas.

FOR THE ANTIPODES.

The Steamer Maheno Sailed Outward Last Evening.

Steamer Maheno, the turbine steamer of the Canadian-Australian line left last night from the ocean dock, for Honolulu, Suva, Brisbane and Sydney. The steamer on arrival at the Australian terminus will be returned to the Australia-New Zealand service until next summer, when she will again make two trips during the busier season. The Maheno had a large number of passengers and between 1,200 and 1,400 tons of general freight, including shipments of agricultural machinery, lumber and miscellaneous freight.

Among those booked is Mr. E. S. Crauford, formerly local agent for the Canadian-Australian line. He has been promoted to a higher office in the service and will reside permanently in the Antipodes. Mrs. Crauford, accompanied her husband.

Others who took passage were: Mr. and Mrs. Nuttle, Mr. Weinwick, Mr. and Mrs. Rogers, Mr. and Mrs. Roberts, Mr. Forsyth, Mr. and Mrs. E. Wilby, N. M. Thomson and wife, J. L. Gilson and party, A. Arnold, M. Buchanan, C. W. Wene, R. Thomson, A. R. Canine, E. Walker, G. Sumerville, Mr. Bartow, E. Rydens, Mr. and Mrs. Green, Mr. Fleming, Mr. J. S. Badger, Charles H. Webb, A. R. Douglas, H. Seddon, M. Waterson, W. R. Bennett, C. O. Marks, Mr. Leventhal, F. Bennett, Dr. McCameron, Mrs. McCameron, Miss A. Hammond, Miss M. Hammond, Dr. and Mrs. McLean, P. Brodie and wife, H. Caultley, E. Caultley, R. L. Tod, F. L. Benson, Dr. O. M. Isaac, Mr. Russell, Rev. J. Urquhart, Miss Russell, Miss Ryerson, Miss McConnell, Mrs. Mitchell, E. A. Strout, Mr. Smith, Mr. McDonald, Mr. Campbell, Mr. McKeating, Alex. Harrington, T. Wood, P. Morrison, J. Davis, A. B. Kent and wife, Mr. and Mrs. Hardaker, Dr. Keller, wife and child, Mr. Keller, J. H. Maxam and wife, Mr. and Mrs. Ward, Mrs. Mating, Miss McDonald, Mrs. McDonald, Miss Smith, E. T. Watkins, R. T. Hawkins, Miss E. Kent, Mrs. B. T. Hawkins, Miss A. Hawkins, L. H. Lowenthal, A. K. Atkinson, V. Drunnoch, Joseph Carter, H. W. Wetenthal, G. L. Dennis, Mrs. Wetenthal and daughter, Miss Walker.

Summer Complaints.

Diarrhoea, Dysentery, Stomach Cramps, Colic, Cholera, Cholera Morbus, Cholera Infantum, Seasickness, and all Looseness of the Bowels

whether in children or adults, can be cured by the use of Dr. FOWLER'S EXTRACT OF WILD STRAWBERRY.

It has been a household remedy for 60 years. It is Rapid, Reliable, and Effective in its action. It is Pleasant and Harmless to take. It does not leave the bowels in a constipated condition. It is for sale by all dealers. It has many substitutes. Do not accept them. They may be dangerous.

Mrs. FRED J. BROOKS, Shelton, Ont., writes: "I have a large family and have been using Dr. Fowler's Extract of Wild Strawberry for years for cholera and cramps, and always intend to use it, for I know of nothing else so good for both children and adults. It gives almost instant relief in all cases of bowel complaint."

A SECOND LORNE.

Big Tug to Rival Local Craft Being Built at Vancouver.

The second largest tug on this coast, or, in other words, a second Lorne, is being built on the ways at the shipyards at Moodyville by J. R. McDonald for the Hastings mill. The tug will be 135 feet long with a 25-foot beam and will have a 15-foot molded depth. Triple expansion engines of 600 horse power with cylinders of 12, 20 and 32-inch will be installed, which will give a stroke of 24 inches. Her boilers will be 12 feet in diameter by 11 feet long and will have a working pressure of 180 pounds, with independent piston valves. Her launching gear will be shipped this month from Glasgow, and the balance of the machinery will be sent in October. The present purchase of machinery was made by Mr. McFarlane, consulting engineer of the Hastings mill, and is the tenth order furnished by Messrs. McKie & Baxter, of the Cleveland Works, of Glasgow. The tug will be used for large towing by the Hastings mill and will be mostly employed outside. She will also tow all large vessels to and from sea that load lumber at the company's wharf.

AFTER VALENCIA VICTIMS.

United States Vessel to Take Bodies From Beach.

A special despatch received last night from the special correspondent of the Colonist at Camranh, Indo-China, says the United States revenue cutter Heather was at Pochena Bay yesterday taking up the bodies of victims of the wrecked steamer Valencia buried there. When the Valencia was lost last February carrying 160 people to death a number of the bodies were recovered and brought to Vietnam, many of which were identified as a result of an excellent system of identification adopted by Superintendent F. S. Cassey of the provincial police, and some were unidentified, those being buried at Ross Bay in numbered coffins. Some few bodies, badly decomposed and unidentifiable, were buried in shallow graves on the beach at the scene of the wreck owing to the difficulty of moving them. Recently the Seattle labor unions collected a fund for the purpose of moving these bodies to Seattle, and at the request of the committee formed for this purpose the United States government placed the U. S. S. Heather at the disposal of the committee. The Heather was, as reported from Camranh, engaged in the work of removing the bodies, and they will be taken to Seattle. It is probable that the Heather will call here en route to the Sound.

MARINE NOTES.

Mr. Theodore Rich, who was one of the passengers on the Chehalis at the time of the disastrous collision with the Princess Victoria, has instructed Mr. Wilfrid Sullivan, barrister of this city, to enter suit against the Canadian Pacific Railway company for damages. Mr. Rich, who is an electrical engineer of London, Eng., suffered severely from the shock and was for some time in the doctor's hands.

W. J. Stevens, the well known local boat builder has designed the model of a new steamer for one of the government officials, to be used in northern British Columbia waters. The vessel will be 85 feet over all, 16 feet beam, and 9 feet depth. Mr. Robbeck is designing the engines, which will be of the Thornycroft pattern, giving the steamer a speed of 12 knots. Tenders will shortly be invited for the construction of the craft.

The schooner King Cyrus, which was in collision with the Chilean bark Curzon off Cape Flattery, has arrived at San Francisco from the Sound. The vessel is minus her foretopmast, bowsprit and jibboom. The King Cyrus was originally bound for San Pedro, but her destination was changed to San Francisco.

Capt. Gibbs, surveyor for the San Francisco underwriters, has arrived from Seattle to survey the bark Battle Abbey. The vessel is in the dry dock at Esquimalt. She was surveyed and the injuries found to be slight. A necessary work was done, and the bark will be floated this morning. Her deckload was put on a scow when she entered the dock and will be released today, when the vessel will continue.

The strike of the workmen at the B. C. Marine Railway Company is being continued.

E. Adams, chairman of the board of stenobut inspection has arrived from Ottawa to examine candidates for the position of inspector of hulls made vacant because of the resignation of Capt. Collier. The examination will be held on the 22nd in the office of J. A. Thomson, inspector of hulls.

Trade With the North.—Among the shipments made yesterday was a carload of wines and liquors consigned to Nome by Messrs. Pither & Leiser. It speaks well of Victoria enterprise when in the face of the keen competition of American coast cities a local concern can secure from Alaska such a fair share of business in this particular line.

Lifebuoy Soap—disinfectant—is strongly recommended by the medical profession as a safeguard against infectious diseases.

BURKE'S DUBLIN WHISKEY

That "it pays to pay for quality" is never more fully exemplified than in the buying of whiskey. Those who prefer Irish Whiskies to those produced in other parts of the world will find in

the realization of their ideal. Produced from the world's finest barley, by experts in its proper manipulation, this fine Old Irish Whiskey is beyond doubt as close to perfection as it is possible to bring an alcoholic beverage.

NOTICE.

The Municipal Council of the Corporation of the City of Victoria having determined that it is desirable to pave, by means of wooden blocks placed on a concrete foundation with stone curbing, Broad Street from the north line of Bates Street to the south line of Johnson Street; Flanagan Street from the east line of Store Street to the west line of Government Street; Government Street from the north line of Johnson Street to the south line of Pembroke Street; Wharf Street from the north line of Johnson Street to the west line of Government Street; and that each and every of said works shall be carried out in accordance with the provisions of the "Local Improvement General By-Law," and the City Engineer and City Assessor having reported to the Council, in accordance with the provisions of Section 4 of the said By-Law, upon the said works of local improvement, giving statements showing the amount chargeable in each case against the various portions of real property benefited thereby, and their reports having been adopted by the Council,

NOTICE IS HEREBY GIVEN that the reports in question are open for inspection at the office of the City Assessor, City Hall, Douglas Street.

WELLINGTON J. DOWLER, City Clerk's Office, August 9, 1906, Victoria, B. C.

VALUABLE FARM PROPERTY AND STOCK FOR SALE.

Tenders will be received by the undersigned up to the 1st day of September, 1906, for the purchase of the undermentioned farm property and stock belonging to the estate of the late Richard Hoey, of Lillooet, B. C. Tenders may be for the whole or any part of the property, as below listed. The highest or any tender not necessarily accepted.

Farm about six miles below Lillooet, consisting of about 680 acres, partly under cultivation. Farm abundantly supplied with water.

Three hundred and thirty-seven acres of farming land situated on Pavilion Mountain, near Clinton, B. C.

About 250 acres of pasture land on Pavilion Mountain, near Clinton, B. C.

About 50 head of cows with calves.

About 150 head of yearling stock cattle, about 180 head of stock cattle two years old and over.

Eight head horses, farm machinery, wagons, and general farm effects.

Tenders should be addressed to:

MESSRS. SMITH & HOEY, Executors R. Hoey Estate, Lillooet, B. C.

IN THE SUPREME COURT OF BRITISH COLUMBIA.

In Probate.

IN THE MATTER OF THE ESTATE OF MARY CORRIN, late of the City of Victoria, deceased.

All persons indebted to the estate of the late Mary Corrin are required to pay the amount of their indebtedness forthwith, and all persons having any claim against the said estate are requested to send full particulars thereof to Charles Hayward or George Jeeves, the Trustees and Executors of the said estate, or to the undersigned, before the 25th day of September, 1906.

Dated the 25th day of July, 1906.

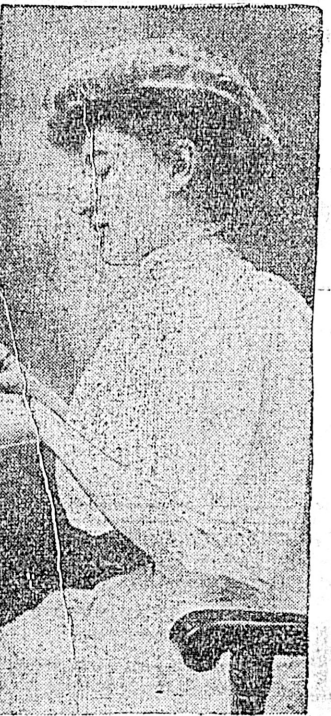

HODWELL & LAWSON, 34½ Government Street, Victoria, B. C., Solicitors for the Executors.

TIDING OVER THE SEASON

JUST about this time of the year hats—even the best one that you've guarded jealously all summer long—begin to take on discouraged lines. Your efforts to invest in a new one are met with anything but enthusiasm by the shops—everybody's deep in what's to be worn next winter; nobody has anything left—there's such a scamporing to get rid of things fairly early each season.

One of the best "brushes" to get the dust out of the tiny crevices of straw or horsehair seem composed of is a bit of velvet. Go over every particle of the hat with it, foliage and ribbons and all, and then follow the treatment with an alcohol sponge bath. Dip a clean rag—one that isn't calculated to shed lint with every rub—into a little alcohol and lightly sponge the whole hat.

Even the foliage may be cleaned, but your rag must be almost dry for it, or the alcohol may have a bad effect upon the leaves, especially if

Even foliage can be cleaned

they are treated, as so many of them are, with a curious waxy something that is a little like varnish, and apt to suffer from too wet baths of alcohol. But there's practically no foliage that can't stand an almost-dry bath and come out from it wonderfully improved.

Go over the foliage—you'll discover leaves bent back here, doubled over upon themselves there. Straighten them out, and cut off any too badly maimed to revive under treatment.

Faded flowers may be touched up with a hot iron—smooth them out and give them a new little curl with a curling iron. The color can be restored as well, if you can handle water-color paints a little.

Making a wash of color and testing it upon a discarded flower will prove whether or not you've just the right tint; and that wash, put on in dry a way as a wash can be applied, is the easiest and best way to do it.

One woman, whose roses are the despair of her friends, because they last so long in apparently perfect condition, says it is because she touches them up with rouge whenever they begin to show signs of fading.

"LIFELESS" FEATHERS

When you are going over the hat itself with alcohol, and notice that the crown is a bit out of shape, wet it with the alcohol until it is thoroughly damp, and set it on a form, or stuff it into shape with crushed tissue paper, until it dries. It will dry in shape, unless you've let it get too badly out of shape before attempting to correct it. If you have, you may have to repeat the process a few times.

Feathers, if they are of good quality, may be washed in a warm sud of soap and water and dried over a radiator, or, if they are of inferior quality, they should be replaced. If they are just apparently lifeless, go over them with a duster, or with a paper cutter—if you are careful not to bring too much pressure upon the delicate fronds, the feather will be simply made to look fresh again without taking on the "kinky," curled look which fashion, for the nonce, has tabooed.

As to tuile and maline, they are best tipped off and renewed when they take on a peculiar limp look. Maline, by the way, is very easy to put on, only crush it a little between your hands before you put it on, to rid it of its too crisp quality. Then loop, and keep on looping it, until you've enough tucked on.

Ribbons are difficult to freshen up by the time they've faded and got soiled to the point of needing something done to them. There's usually nothing for it but to use new ribbon.

Picking Up the Stitches

THE sheer fine linen thread and silk stockings that are worn with low shoes must be carefully watched for the first break, if they are to give even ordinary wear.

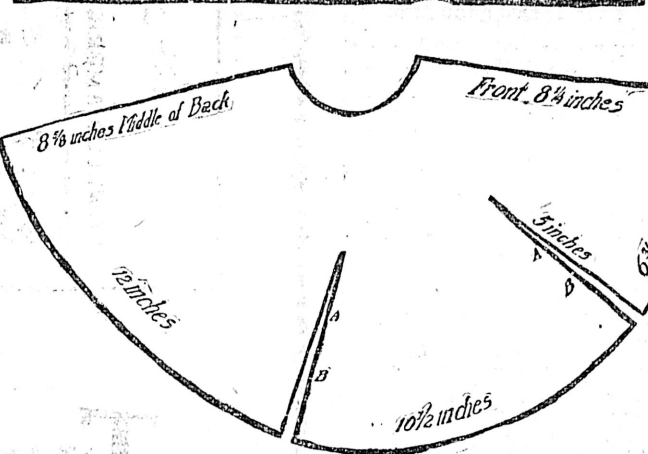

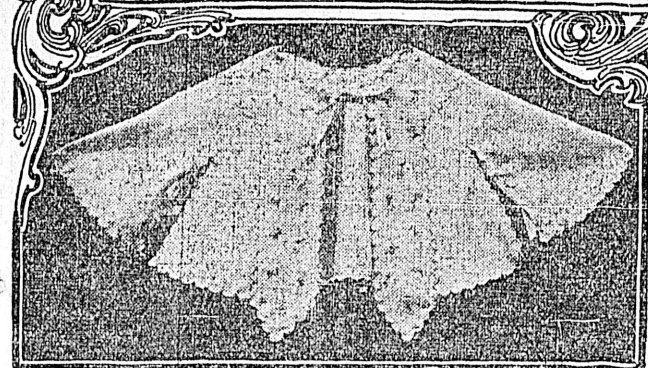

Whenever a pair is taken off it should be thoroughly examined for that first slipped stitch that works such havoc if not caught. In one wearing an expensive stocking may be ruined by a thread running the entire length of the leg.

As soon as a break is discovered mend it, if it is at midnight. A stitch or two will be taken off it should be fastened when the slip is caught and fastened a few running or darning stitches should be taken above and below it for fear another break may have been overlooked.

One woman has hit upon the novel plan of using a very fine crochet needle to catch the slipped stitch, crocheting back as far as the "run" extends.

It is really advisable in case of the sheerest stockings for their owners to wash them out carefully in lukewarm water, rather than trust them to the tender mercies of the family laundress.

A Baby's Embroidered Nightingale

HARDLY anything in the wardrobe of the average wee mortal is so all "round satisfactory" as is a sacque made upon "nightingale" lines, which are nothing more complicated than the cutting of a circle and slashing it up to make kimono-like sleeves.

Customer is one of the best materials to make it of, and challs—either the plain challs in some pale baby tint or the pretty little Dresden or dotted kinds—about as satisfactory. Either should be lined with China silk—a quality that is good enough to launder well.

If you intend to scallop the edge, measure off the circle (according to the proportions of the diagram), and baste lining and outside together. Don't cut them out, however, until the embroidery is entirely finished.

The stamping must be done with exquisite care, or the delicate stuff may be soiled, and you don't want to have to wash this sacque before it is worn. Laying impression paper over the material and the pattern on that, and then going over the lines with a hard pencil will undoubtedly transfer the design; but take care, if you do it this way, not to rest your hand upon the pattern, at least any-

where within the radius of the sacque; for, like the design itself, that pressure will be transferred to the material underneath.

A better, though more difficult, way is to pin the material over the design and hold them up against the light—a window pane is the easiest medium through which to accomplish this—and trace off the design directly upon the material. The pencil marks won't "rub," unless you make the mistake of using so soft a pencil that the lines are nothing more than tiny ridges of soft lead.

Very little padding is necessary, and that, of course, is confined to the scallop, which, besides outlining yoke and front panels, runs around the edge of the sacque.

The tiny flowers may be done in the natural colors, or in a pale contrasting shade, or a shade that matches the material exactly. Probably the prettiest treatment of all is that of making the outside of white, and the lining of the palest tint of pink or blue, the embroidery done in wash silk that matches the lining—what is even prettier—in a shade that matches the tint as it shows through the white.

Defying the Persistent Fly

THE shrill burr of the locust, the croak of the frog or the chirp of the cricket are no more typical vociferations of August than the wall of the irritated housewife's "Silly, fly, don't bother me!" Those pesky insects, trying at any time, seem to maliciously reserve their worst malignity till the sticky dog days to make life generally unbearable. Then how they swarm! Their maddening buzz in our ears and persistent, stealthy step on our flesh drives sleep away, while their frantic gyrations round every morsel of food in sight destroys what little appetite the heat has left.

Now, if flies were only annoyances they would be of no account. It is in the interest of our dispositions, but they carry in their trail a distinct menace to health that is a legitimate "cause belli." Once the careful housewife fought flies for the sake of her reputation and gilt picture frames; now, grown learned in hygiene, she is yet more bellicose to preserve the family health.

The mosquito is an acknowledged disease spreader, but the fly, equally at fault, has attracted less attention. It is not pleasant to ponder the ill effects these winged pests have wrought, as shown up in recent military investigations. In the Spanish-American War, where disease, rather than bullets, worked havoc, the fly was found to be dangerous to human life by more tests. One, gruesomely convincing, was the sight on a mess table of dozens of flies with whitewashed feet, gained from a lime-sprinkled, typhoid-infected cesspool. It was also found that contagion was much less prevalent in the closely screened officers' quarters than in the tents of the common soldier.

SCREEN THE FIREPLACES

It is futile to dwell overmuch on such unpleasant facts; the main thing is to limit the fly's power for harm whenever possible.

In the halcyon days when government does all that should be done by the individual, it may be in keeping up the health average, there will be a systematic raid on the breeding places of flies. Their larvae, as well as those of mosquitoes, can be destroyed by petroleum. In the meantime woman must take a hand.

Flies should be prevented from entering our homes and the stores where food supplies are kept. Screen all doors and windows. If you cannot afford wire ones, use netting—the finer the better.

See that they are put in very early in the spring before the first fly puts in an appearance. True, you will probably hear remonstrances from the masculine members of your family—why have most men such a chronic objection to screens?—but be diplomatically deaf.

If you can afford the permanent wire screens that pass on a groove on the outside of the window, doubtless many of these objections will be overcome. As to man usually falls the unpleasant task of hurriedly shutting in the face of a coming storm, windows from which patent folding screens must be jerked, this dislike is not so unaccountable as it first appears.

It is not enough to protect doors and windows, but all open fireplaces should be screened, as well. Even then, however, one cannot rest perfectly secure for the fly has a propensity for overcoming obstacles that would be highly creditable, if not so maddening.

Cherchez la cause should be the usual answer to the plaintive query, "I wonder where those flies come from?" As a rule, the difficulty lies in the kitchen; most cooks share their master's aversion to screens, and will shove open a door at every opportunity. Work upon their fears of the fly as a disease breeder, and it may be a more good than strictest injunctions.

An inroad once made, nothing remains but war to the death. The methods are many, some disagreeable, laborious and overheating.

Were you ever inflicted in your youth with a fly-eating mother? If so, you have seen the whole painful gamut of fly chasing. Who has not felt to be a nightmare that interminable hour after breakfast when, a newspaper in hand, one had to run round and round a dark room, flapping at the ceiling like an animated rooster? Little hapless was your fate if your part was to stand sentinel over the ice-chink of light in the room. Who ever stopped her guard at just the right moment? Or who has not lapsed into an occasional happy dream, only to be rudely aroused by the stern remonstrance, "Daughter, I put you there to keep flies out, not to let them in!"

Well, well, fate is better to the present-day child! Even the "y" is not beneath the inventor's notice, and we have all sorts of patent contrivances for its undoing.

If we have Neroneque propensities, for instance, we can indulge in one of those cone-shaped wire catchers on a curved wooden base. A little sugar at the bottom has a more potent success than had Mistress Spider in enticing Master Fly into the parlor. Once through the hole at the top there is no escape until, the trap well filled, the contents are dumped in the kitchen stove—if you are foolish enough not to use a gas range—or immersed in boiling water.

Fly paddles certainly are a more exciting method of destroying woman's natural foe than the older, laborious method of beating them with a towel.

Sticky papers also have their place—this, by way of advice, is not on a chair seat. For the comfort of those who have sat down on one of these fly enticers (if wearing a boucle cloth gown it is a particularly happy moment) it is well to call attention to the guards like a curved wire cage that come to prevent such catastrophes.

In the use of sticky fly papers select the non-poisonous kinds. Also be particular about the use of poison liquids standing around in saucers.

Since any of these contrivances are far from slightly, especially when successful, never allow them to stand around for days at a time. This is particularly objectionable in a dining room.

Do not despair. Flies can be conquered even through a "rainy spell" in August. It will take eternal vigilance, though, to force that "sloody" not to "bother," or, worse yet, harm.

With a Doll's Churn

ANY ONE who has once acquired a taste for unsalted butter becomes almost pathetic in his desire for it. There is no denying it. The cream of butter, from which the first freshness has passed, made possible when you eat it in its unsalted state, and fresh butter is a delight in itself to procure and the ordinary mortal blessed with a healthy appetite alike.

Tiny churns—really dolls' affairs—come, in which a leftover bit of cream may be beaten up in a little while into delicious butter; and the buttermilk, although meagre as to quantity, will be very different from the best sort the average city dweller is used to.

Chill the cream first, and keep it chilled while you are working with it, and only the shy dasher with a will, when the butter "comes," work the lumps together with a wooden spoon; press, to exclude every drop of moisture, and mould into little balls with butter noddies.

That Salty Taste. WHEN too much salt gets into cooking, add a little brown sugar. It will correct the over-salty taste without "tasting" itself.

Airing Linens. LINENS should be given a thorough airing every now and then—most thoroughly of all, of course, just after they have come upstairs from the laundress.

Plenty of light and air, as well as soap and water, are necessary to keep them in spotless condition, for what occurs reason only some one wise in the laws of physics can tell.

But the results will tell their own tale—freckles and mould and mildew.

Plaids for Petticoats. ATTRACTIVE workaday petticoats for the women who are too hard on silk ones to subject them to daily trials are made of mohair in pretty Scotch plaid effects. Most of them are rather sombre, except for a thread of yellow which may lighten the whole piece. And lots of plaid silk petticoats are being made up now to wear with fall and winter suits, some of them made to match the skirtwaists.

When the crown needs shaping

An Alcohol sponge bath

The Other Side of a Threadbare Argument

FOR some time there has been sounded in the newspapers and magazines a protest, deep and far-reaching, against the present-day influx of women into the rank and file of business life.

Matrimony is going out of fashion, is the cry. Housekeeping is becoming a lost art. Children are almost a novelty. Why don't the women stay at home, marry and have babies in the good, old way that God intended them to?

One magazine which published statistics of the marriageable women in the Eastern States, as compared with the marriageable men in the Western, goes so far as to advocate the emigrating of these same surplus spinsters to the land of the unattached male.

The government of a certain Canadian province, distraught at the lack of marital prospects for its young men, has offered them free transportation into the United States for the purpose of seeking wives, and return transportation for both men and wives when the latter are secured.

WHEN FATE TAKES A HAND

These instances have their prototypes in history. The early settlers of Jamestown bought their helpmates with tobacco.

Now it is granted that marriage is the natural state of most human beings; granted that it is the safeguard of the country's morals; that it is the most desirable harbor into which the average young man or maid may anchor—but there is another side.

First, every woman is not built for matrimony. It is no use saying that she should be—that the woman who does not prefer rocking a cradle to discovering a new constellation is abnormal. The fact remains that there are women so constructed, and they have to be content with what they are.

Second, there are women whose nature apparently constructed most specially for the duties of wife and mother, who, when fate has played another trick.

This world moves sometimes in a contrary manner; and it occasionally happens that the woman who in her innermost soul is convinced that the four walls of a kitchen bound an earthly paradise, and who almost would give her hope of heaven for the chance of making tiny dresses for a baby that is all her own, is left to flourish hideously on the parent stem, while her sister, who "hates housekeeping," and thinks "children are frightful bores," is hustled to the altar before she is fairly out of her teens.

To tell women of this first class to go into other lands to find husbands is little less than insult, smacking a trifle of vulgarity. Women may do all in their power to draw men to them, but they don't do it. That the men know, unless they are very artistic in their methods.

Then there are other reasons for women remaining single. There are the women possessed of ideals, which never seem to be realized. It is all very well to tell them that no man exists who is a compromise between Sir Galahad and a Richard Harding Davis hero, and that she would be wiser to take the nearest approach to either that presents himself, and try to invest him with a little glamour. She won't believe you, even if she follows your advice, and it's best to let her alone.

There is the woman who has loved one man, and hasn't the sort of heart that is capable of holding another. Marriage is a big part of life, but it isn't all of it. It should be encouraged among people of intelligence in order to keep the world's population up to a fitting standard, if for no other reason. Yet, on the other hand, it is well known that only children of the properly mated attain the highest mental and physical development. In view of this fact, it seems hardly probable that the products of unloved unions should strictly utilitarian principles should play an important part in history.

Let the average woman marry, by all means; but for her whose heart interests are elsewhere there are other things.

MR. CLIFFORD BACK FROM THE NORTH

Had Pleasant Visit to Big Constituency Which Is Growing Rapidly.

TELLS OF ENORMOUS RESOURCES

Progress at All Points—Great Development in Mining.

C. W. D. Clifford, M. P. P., returned yesterday from Port Simpson and the Skeena from a business visit in connection with the affairs of what has been hitherto known as the Cassiar district, but which has now been subdivided, since the last redistribution, into two parts, the northern portion as Atlin, represented by Dr. Young, and the southern as the Skeena, represented by Mr. Clifford and including the rich islands of the Queen Charlotte group. Although the Skeena electoral district covers an area of some 80,000 square miles, its registered voters numbered little more than 2000 at the time of the last election, though since there has been a rapid increase, and in all probability the number will have been increased to 3000 before the next election comes around, as many of the settlers are so far not registered on the voters' list.

Mr. Clifford is keenly alive to the enormous natural resources of his district, which, according to all reports, is a veritable treasure house of undeveloped wealth, awaiting only the artificial facilities necessary to bring its riches within the grasp of man.

"It is undoubtedly," said Mr. Clifford in conversation with a Colonist reporter, "the richest portion of British Columbia, in minerals, agricultural resources, timber and fish. On the Queen Charlotte Islands, coal—anthracite and bituminous—is found in quantity and quality; while in the Telegraph basin over fifty square miles of coal fields are held under crown grants, licences and leases. In this quarter the Grand Trunk Railway Company owns 26 square miles of the richest of the coal lands and have men at present working upon them. The coal found here is known to be equal if not superior in coking quality to the Crow's Nest Pass coal, and for smelting purposes and as a fuel for the extensive copper, gold and silver mining industries of the district the advantage is obvious. Mr. Clifford exhibited some splendid samples of copper-gold and copper-silver ores from the Telqua, Kitsilas Canyon and Gold Creek, and stated that a group of copper properties has recently been bonded on the Telqua to an American syndicate for \$60,000, 10 per cent. having been paid down in cash after an examination of the property, which is a convincing proof of their opinion of its great value.

Mr. Clifford accompanied the Premier on his recent trip up the Skeena to Hazelton, accompanied by Judge Young, and the Premier regretted greatly that he was unable to proceed further, as he had to return in time to catch the steamer to take him north to Atlin. Mr. Clifford himself then proceeded from Hazelton to Aldermere, 65 miles south of Hazelton on the Bulkley River, where a very successful meeting was held, the people displaying great appreciation and seeming well satisfied with what the government had done and intended to do in opening up the country. In fact everything looks well for the prestige of the Conservative party in this direction.

The new trail from Hazelton to the Bulkley valley is now really in good order, the government having spent \$4,500—upon it this year, it is now all that can be desired. This work is independent of the two first class bridges which have been constructed over the Bulkley river last fall. The feeling now is that it is imperative that a sleigh road should be made on the line of this trail to enable farmers to get in machinery implements, and supplies cheaply this winter. Transport from Hazelton to Aldermere costs at present 3 cents per pound and the people are

Treating Wrong Disease.

Many times women call on their family physicians, suffering, as they imagine, one from dyspepsia, another from heart disease, another from liver or kidney disease, another from nervous exhaustion or prostration, another with pain here and there, and in this way they all present alike to themselves and their easy-going and indifferent, or over-busy doctor, separate and distinct diseases, for which he, assuming them to be such, prescribes his pills and remedies. Actually, these are all only symptoms caused by some uterine disease. The physician, ignorant of the cause of suffering, encourages this practice until large bills are made. The suffering patient gets no better, but probably worse, by reason of the delay, wrong treatment and consequent complication. A proper medicine like Dr. Pierce's Favorite Prescription, directed to the cause would have entirely removed the disease, thereby dispelling all those distressing symptoms, and instituting comfort instead of prolonged misery. It has been well said, that "a disease known is half cured."

Dr. Pierce's Favorite Prescription is a scientific medicine, carefully devised by an experienced and skillful physician, and adapted to woman's delicate system. It is made of native medicinal roots and is perfectly harmless in its effects in any condition of the system. As a powerful invigorating tonic "Favorite Prescription" imparts strength to the whole system and to the organs distinctly feminine in particular. For overworked, "worn-out," "run-down," debilitated teachers, milliners, dressmakers, seamstresses, "shop girls," house-keepers, nursing mothers, and feeble women generally, Dr. Pierce's Favorite Prescription is the greatest earthly boon, being unequalled as an appetizing cordial and restorative tonic.

As a soothing and strengthening nervine, "Favorite Prescription" is unequalled and is invaluable in allaying and subduing nervous excitability, irritability, nervous exhaustion, nervous prostration, neuralgia, hysteria, spasms, chorea, St. Vitus's dance, and other distressing, nervous symptoms commonly attendant upon functional and organic disease of the uterus. It induces refreshing sleep and relieves mental anxiety and despondency. Dr. Pierce's Pleasant Pellets invigorate the stomach, liver and bowels. One to three a dose. Easy to take as candy.

very anxious that the government should do this.

The object of Mr. Clifford's visit is, therefore, to lay these matters before the government with a view to having the work done this fall.

Another thing, continued Mr. Clifford, that the people are anxious to get done is to have a trail cut from the mouth of the Copper river or Kitsilas canyon into Aldermere, a distance of not over 80 miles; this I am trying to get the government to do this fall. This trail would pass through a fine mineral country and will enable prospectors to take in supplies by a route much shorter than that via Hazelton.

There are about 90 bona fide settlers on the Bulkley valley at present and over one hundred prospectors on the surrounding mountains.

"I interviewed a number of miners," said Mr. Clifford, "who have been out prospecting and without exception they spoke most favorably of the country from a mineral point of view. These were mostly old and experienced miners from Butte and Kootenay and all unanimously assert that they never saw a country with better surface showings or such well-defined ledges. The country rock here is granite with porphyry dykes. There is abundance of water power and ample timber for all mining purposes.

"A sawmill is being erected about a mile and a half from Hazelton on the Bulkley. Coming out we met some of the machinery en route. They expect to be working in about a month's time.

"The town of Aldermere contains two hotels, a store and an assay office among its institutions. Provisions there are good and plentiful, beef, milk, butter and vegetables in ample supply. The chief hotel is owned and ably conducted by Messrs. Broughton and McNeil and the table they keep is certainly one of the best to be found beyond Victoria.

"Great dissatisfaction is expressed throughout the Bulkley valley concerning the immense amount of land blanketed by South African scrip and now lying idle in the hands of speculators, who, since it is free from taxation for five years, are merely holding for an advanced value.

"People, however, attach no blame to the present government in this matter as it is well known that the act was passed previous to its accession to office.

"There are some fine ranches there now in active operation, large fields of oats and potatoes and vegetables of all kinds are growing well. Butter making has commenced as a profitable pursuit, although there is at present no access to outside markets the local demand is quite equal to the supply for the present and will increase side by side with production until the advent of railway construction creates a large and regular market.

"The Grand Trunk Pacific have three survey parties between the proposed terminus at Prince Rupert and the Bulkley valley, two on the Skeena and one in the Bulkley valley. The grade of the railway is limited to two-fifths of one per cent and this grade is only to be got by following the course of the Bulkley river and Skeena river valleys. A short cut could be made by going up the Copper river below Kitsilas canyon and following it up to the head of the Copper river and thence to Aldermere. This would save 70 miles of distance but as it would entail a grade of not less than one per cent it would defeat the apparent intention of the Grand Trunk to have two-fifths of one per cent grade on their main line, there, I believe the main line of railway will follow up the Skeena and Bulkley water-courses.

"There is a belt of country with which I am very favorably impressed," added Mr. Clifford. "It extends from above Kitsilas canyon down the Skeena below Kitsumkahum, a distance of about twenty miles and extending at least ten miles.

"On each side of the river, where the conditions as to soil and climate are ideal as regards fruit raising, Mr. Dave Stewart took up land below Kitsilas canyon, about five years ago and planted fruit trees—apple, pear, cherry and plum and I may say I have never seen a finer crop of these fruits than that in evidence there this season.

"In this belt summer frosts are unknown, the winters are mild and there is sufficient rain for rich vegetation and very warm summers are the rule. The soil is light, sandy loam and the land is not difficult to clear.

"About 30 settlers are in there now and this section will undoubtedly eventually supply the terminal city with its fruit and vegetable supply as the vicinity of Prince Rupert is not favorable to agriculture, but will supply a great market for the district in question, at a distance of not greater than two hours' run by rail. So far as I know it is the only fruit belt between Prince Rupert and Edmonton and it appears to me that this land should become very valuable before very long.

"There are three steamers on the Skeena this year—two belonging to the Hudson Bay company and one to Captain Bonson, the latter being the steamer Pheasant. These are a source of universal satisfaction and constitute a good and regular service.

"Altogether," concluded Mr. Clifford, "as I have already said, it is my opinion that the Skeena district will prove to be the richest section of British Columbia and will eventually support a population of enormous proportions. I am importuning the government," said he, "to build this sleigh road from Hazelton to Aldermere and the trail from Kitsilas canyon to Aldermere this fall and after an interview with the chief commissioner, I judge from the courteous interest with which my proposal and representations were met that I have succeeded in convincing the government, who were already alive to the general requirement of the district, of the urgent necessity of adopting prompt measure to meet our needs and putting the work in hand this fall.

"To my mind, one of the most splendid sights the world contains is to be found at Aldermere. Standing there you take in one magnificent panorama—the three great mountains, the Telqua, the Hudsons' bay and the Babine, all within a radius of thirty miles from Aldermere. All rich in mineral wealth and intersected with wide stretching valleys, rich in easy possibilities of the near future, miles of arable land, well watered and prolific, only awaiting the advent of capital and transport to pour their riches upon a prosperous land.

WELLMAN EXPEDITION.

London, Aug. 16.—A dispatch from Christchurch to the Daily Mail says that private letters received there for Spitzbergen state that owing to the lateness of the season, Walter Wellman, the chief of the Chicago Record-Herald Arctic expedition, has abandoned the project of ballooning to the North Pole this year.

HAMILTON UNION HAS BEEN SUSPENDED

Extraordinary Situation Affecting
Typographical Union in
the East.

Hamilton Times, Aug. 6.

Hamilton printers are in a position today that they have never been in before. The whole Hamilton union has been suspended by the international union, and what the outcome will be remains to be seen. The trouble has been brewing for weeks, but the climax was reached on Saturday, after several conferences between the union and Mr. Kluskey of Buffalo, who represents the international union. Hamilton Typographical Union, No. 129, is one of the oldest trades organizations in the country. It has been in existence over 40 years and has always been considered one of the strongest in the international body.

A year ago, at the international meeting, it was decided to introduce a universal 8 hour day. In Hamilton the rule came into effect about the beginning of this year, the demand being conceded by the employers and an increase of wages being granted at the same time. In other places the demand was refused, and the printers were called out. Some of them have been out ever since. To maintain the strikers the men at work have been levied upon at the rate of ten per cent. of their entire earnings. Ten per cent. is a very large proportion. It meant more than the local men's increase of wages, but they paid it without a murmur for about five months. Then they learned that in some places in the United States, and Canada as well, the 10 per cent. was not being paid. Mark Ink inquiries, they were told that President Lynch of the international, had given printers of some unions the privilege of paying 30 cents a week instead of 10 per cent. into the strike fund.

The Hamilton union met and decided to do likewise, and for about two months 50 cents a member a week has been paid.

This change was soon noticed by the international and communication was opened. The Hamilton men stuck to the position they had taken, and the international threatened to suspend them. The union met and stood firm, authorizing the secretary to notify the international that it would surrender its charter and that an officer might be sent to get it. This the international declined to do, nor did it suspend the local union. Further correspondence followed, and on Friday last Organizer Kluskey came from Buffalo and was in conference with the union on Friday night, Saturday and Sunday. The outcome was that, after the Friday night meeting, the printers still standing firm, the international suspended the local union, Saturday's and Sunday's conference failed to bring about a reconciliation.

The local printers went so far as to agree to resume paying 10 per cent., but they very firmly declined the international's demand to pay arrears.

The local printers have a three year agreement with the employers, which has still two years and five months to run. In all the city offices work went on today just the same as if nothing had happened. It is said that the Canadian unions generally will back up the Hamilton men. Some go so far as to say that they would be better off if not affiliated with the international union at all, but had a Canadian union instead.

THE DREADNAUGHT.

An Admiralty Memorandum Discloses
Some Secrets.

An Admiralty memorandum just issued disclosed the chief secrets hitherto withheld of the construction and armament of the Dreadnaught.

The cost of the vessel up to March 31st next, excluding armament and ordnance stores, is estimated at £1,678,777. The original estimate was £1,684,297, and that of the guns £113,220. Her armament is officially given as ten 12-inch guns and twenty-seven 12-pr. Q.F. anti-torpedo-boat guns and five submerged torpedo tubes. A limitation of the number of guns was imposed by considerations of the blast effect on the crews of adjacent guns. All-round fire being considered of great importance, six of the guns are mounted in pairs on the centre line, the remaining four in pairs on the broadside. Thus eight 12-inch guns (80 per cent. of the main armament) can be fired on either broadside, and four, or possibly six 12-inch guns (60 per cent. of the main armament) can be fired simultaneously ahead or astern.

In view of the potentialities of modern torpedo craft it is considered necessary to separate the anti-torpedo-boat guns as widely as possible from one another, so that all shall not be disabled at one or two heavy shells. This consideration led the committee to recommend a numerous and widely distributed armament of 12-pr. Q.F. guns of a new design and greater power than those hitherto carried.

For good sea-going qualities a forecastle is provided, giving the ship the highest known freeboard forward of 28 feet.

The main armour belt has a maximum thickness of 11 inches at the forward and 4 inches at the after extremity of the vessel; the redoubt armour varies in thickness from 11 to 8 inches; the turret and fore conning tower is 8 inches thick; the protective deck varies from 1 3/4 inches to 2 3/4 inches in thickness.

Special attention has been given to safeguarding the ship from destruction by under-water explosion. Designed speed is 21 knots. The ship has a total coal-bunker capacity of 2,700 tons, and with this she will be able to steam about 5,800 sea miles at economical speed and about 3,500 sea miles at 18 1/2 knots. Stowage for oil-fuel has been arranged for, but this has not been taken into account in estimating the radius of action, which, of course, will be greatly increased thereby.

The armoured cruiser Invincible, now building at Elswick, is estimated to cost £1,736,045. Her dimensions are 530 feet long, 78 1/2 feet broad, 26 feet mean draught. 17,250 tons displacement (the Dreadnaught's is 17,900). Her armament is not given. The inflexible and indomitable building at Clydebank and Fairfield, Clyde, have the same measurements, and are to cost £1,726,990 and £1,730,733. The date of completion of the three is 1908-9.

His Majesty's new turbine yacht Alexandra is estimated to cost £130,700.

A MODEL FAMILY.

"I do not think that our family has been without Chamberlain's Colic, Cholera and Diarrhoea Remedy since we commenced housekeeping years ago," says E. W. Archer, manager of the Republican Journal, Caldwell, Ohio. "When we go on an extended visit we pack it in the suit case so as to be prepared to ward off any trouble that may be caused by change of water and food." For sale by all druggists.

Wash greasy dishes, pots or pans with Lever's Dry Soap a powder. It will remove the grease with the greatest ease, 36

RECEIVED of the Publisher of *Colonist, Victoria, B.C.*

One Hundred Dollars

for guarantee of circulation rating in Rowell's American Newspaper Directory.

THE PRINTERS' INK PUBLISHING COMPANY, INC.

Lea & Co. Manager.

Publishers of Rowell's American Newspaper Directory.

CONDITIONS.

The absolute correctness of a circulation rating in America appears in Rowell's American Newspaper Directory, or to be inserted in the next issue of the book, based upon a satisfactory statement from the publisher of a paper, of the actual sale for full year, is guaranteed by the Directory publishers, under a forfeiture of one hundred dollars, payable to the first person who successfully asserts the accuracy of the said rating. The guarantee thus made, and the forfeiture offered by the Directory, is secured by the publisher of this paper by the deposit of one hundred dollars in the publishers of the Directory as a permanent deposit. The guarantee is perpetual so long as the newspaper publishes statements in good faith substantiated and the Directory continues to be published. The money paid is not returnable to the publisher at any time or under any circumstances.

THE ONLY NEWSPAPER —IN— BRITISH COLUMBIA

Whose Circulation Is
Absolutely Guaranteed

THEREFORE:

The Only Newspaper in British
Columbia of KNOWN VALUE
as an Advertising Medium.

The publishers of "PRINTERS' INK," the leading printing trade journal, in its issue of April 18h last, inserted the above guarantee that "The Colonist" statement of circulation is correct.

The circulation rating of The Colonist can be ascertained at any time.

ADVERTISING CONTRACTS

Are made on this basis. "Cash is King, and Coin Talks." When you buy space in The Colonist, you are not paying for padding, but good, live, cash-in-advance circulation. The circulation that goes into the homes is the circulation that counts.

SPORTS

LACROSSE

No Senior Games

It is very likely that the New Westminster and Maple Leaf lacrosse teams will not be seen on the local grounds this season, as was anticipated. As will be remembered, it was the intention of the local club to arrange exhibition games with all three of the senior teams to be played in this city, but as yet the Vancouver team is the only one that has been seen. The local management were sincere in their intention to have all the teams play here, but owing to the light support that they have received during the season, they find it to be almost impossible to bring them over; and in consequence they have notified the clubs that they are unable to fulfil their obligations at this time. It is probable, however, that an effort will be made to arrange the games later in the season.

BASEBALL

Buying Players

The baseball clubs of the big Eastern leagues are already commencing to make their annual grab from the Pacific Coast players, and the Portland club has sold Pitcher W. Easlick and Catcher L. McLean to the Cincinnati National League club.

ATHLETICS

Arranging Field Meet

The members of the Vancouver Athletic club are preparing for a big field meet to take place on Saturday, September 22, at Brockton Point. Arrangements have been made to have W. Sherring, the winner of the Marathon race, take part, and it is expected that he will prove a good drawing card. A fine programme of sports have been arranged, which includes:

1. Low hurdle race.
2. Junior 220-yard race.
3. Senior 220-yard race.
4. Putting 16-lb. shot.
5. Running high jump.
6. Mile run, seniors.
7. Mile run, juniors.
8. Running high hurdles.
9. Throwing 16-lb. hammer.
10. Throwing the discus.
11. Quarter-mile run, seniors.
12. Quarter-mile run, juniors.
13. Hundred-yard race, seniors.
14. Throwing 56-lb. weight.
15. Running broad jump.
16. Two-mile race.
17. Half-mile race, juniors.
18. Half-mile race, seniors.
19. Hundred-yard race, juniors.
20. Sherring to contest Canadian five-mile record.

BAD ATTACK OF LA GRIPPE.

"A year ago I had a bad attack of la grippe and all the doctor's prescriptions proved of no avail. I was told to try Dr. Chase's Syrup of Linseed and Turpentine and found it a great blessing as it thoroughly cured me. I told my doctor that I intended to recommend it to all my friends."—Mrs. R. Hutton, 12 Claremont St., Toronto, Ont.

FINED FOR STARTING FIRE.

New Westminster, Aug. 17.—A fine of \$100 and \$20 costs was imposed upon Robert Hawthorne by Magistrate Pittendreich yesterday who found him guilty of having started the bush fire that recently devastated the Blue Mountain district. The fire not only destroyed a large quantity of valuable timber but also burnt out the house, barns, etc., of a settler and the fire was proven to have been caused through his neglect to make a sufficient clearing around his logging engine, which was from which started the fire. Crown Timber Agent Leamy prosecuted the case.

GO TO
John D. Rockefeller
THOU SHOPPER
Consider His Ways

This advice is given because Mr. Rockefeller is an improvement upon the fabled aut—formerly chief example of hustle and thrift.

It is related of the richest American that, in reply to a friend, who asked him about the reasons of his success, he said, in effect;

I Think My Business Success
Is Due Largely to Having Always
Tried to Place a Proper
Value Upon Units.

This idea is so big, so all-embracing, that it is a safe creed for any one, business-man or who-not. It goes beyond the ant and the "busy bee" who have preached—chiefly long hours of labor!

The shopper—which means the universal woman and the nine-tenths universal man—has a daily opportunity to test the unit rule—to buy one thing at the right store and right price before making a second purchase, and to repeat the process indefinitely—thus making right buying yield a real income, as over wrong buying, at the end of the year. Of course, only shoppers who study advertisements are able to place a "proper value on units," so that the point of this preachment is plain.

TO LET—RESIDENCES

TO LET—6 roomed furnished house, 11 Hillside avenue. Apply Coffey, 333 Government street. aul17
